QUESTION 1

You are working in a project where you need to develop a rule to calculate the currency attribute "the person\\\'s total taxable income". The person\\\'s total taxable income is either the sum of the attributes "the person\\\'s wages" and "the person\\\'s interest" or $50,000, whichever is lower.

What rule should you develop?

A. the person's total taxable income = MinVal((the person's wages + the person's interest), 50000)

B. the person's total taxable income
Minimum((the person's wages + the person's interest), 50000)

C. the person's total taxable income
MinVal((the person's wages + the person's interest), 50000)

D. the person's total taxable income = Minimum((the person's wages + the person's interest), 50000)

E. the person's total taxable income = Minimum(the person's wages + the person's interest), 50000)

A. Option A

B. Option B

C. Option C

D. Option D

E. Option E

Correct Answer: B

QUESTION 2

When creating your rules, you have used the attribute "the gun fired accidentally". When adding this input to a screen, you notice that the question form of this attribute is "Is the gun fired accidentally true?".

In which way should you resolve this issue to ensure that the word "true" is not included in any text shown to the interview user (including explanations)?

A. Add the verb "to fire" and change the attribute sentence forms in the Edit Attribute dialog box.

B. Remove the word `accidentally" from the attribute text.

C. Create a custom attribute text in the Edit Attribute dialog box.

D. Add the verb "to fire".

E. Change the question text on the screen.

Correct Answer: C

QUESTION 3

You have an entity called "the child". You have three attributes called "the child\\'s score," "the lowest score of all the children," and "the number of children scoring more than ten." You want to write two rules to infer the lowest score of all the children and the number of children scoring more than ten without creating any additional attributes in the child entity.

Which two entity functions do you need to use?

A. InstanceMaximumIf

B. InstanceCountIf

C. InstanceMinimumIf

D. InstanceSum

E. InstanceMaximum

F. InstanceSumIf

G. InstanceCount

H. InstanceMinimum

Correct Answer: DE

QUESTION 4

Which three statements indicate a need for entities in the policy model?

A. Calculate the total subsidy amount, based on the applicant\\'s age.

B. Collect the family\\'s income details, but only for family members over 18 years of age.

C. Determine if the child is allowed on the roller coaster, based on the child\\'s height.

D. Calculate the total compensation across all injuries, based on the impairment level of each injury.

E. Calculate the total price reduction across all assets, based on the discount percentage for each asset type.

Correct Answer: BCD

QUESTION 5

Which four are valid reasons to split an existing Word document containing rules in your Oracle Policy Modeling project?

A. Two developers need to work simultaneously on different areas of rules that were originally within the same Word document.

B. You want to use the Debugger to test your rules.

C. You want to separate rules with different purposes.

D. Editing the new documents is easier in Microsoft Word because the original document was getting too large.

E. You want to add comments and footnotes to your rules.

F. You want to exclude part of the original document from the policy model.

G. You want to mirror updates to the source material that has divided the source of your rules into two locations.

H. You want to define screens to run in Oracle Web Determinations.

Correct Answer: CFGH
