QUESTION 1

Which three actions will help avoid or identify a multiply proven attribute error?

- A. Double-click the attribute on the Interview tab to see if the attribute is used on multiple screens.
- B. Use the "Go To" option in Word to see if the attribute is proven in another rule.
- C. Right-click the attribute on the Data tab to see if the attribute is proven in another rule.
- D. Right-click the attribute on the Project tab to see if the attribute is used in multiple forms.
- E. Check the error list on the Rules tab for multiply proven attribute errors.

Correct Answer: CDE

QUESTION 2

An inclusion has had certain assets overridden in the destination project.

What happens when the inclusion is updated?

- A. Changes in the destination project are overridden to match the updated inclusion.
- B. Changes made in the destination project are left unchanged, but all other inclusion updates are applied.
- C. An error occurs.
- D. The policy modeler has the choice whether to accept or reject the change.

Correct Answer: D

QUESTION 3

You have a number attribute "the child's age in years". In an interview, you want to ensure that the user is only able to enter ages between 0 and 15.

What are the three methods to achieve this?

- A. Specify the maximum and minimum values within the Edit Attribute dialog box.
- B. Write a warning event rule.
- C. Use a regular expression within the Edit Attribute dialog box.
- D. Write an error event rule.
- E. Create a number value list with the allowed ages, then associate the list with the child's age attribute.

Correct Answer: ADE

QUESTION 4

You are creating an online advice tool to help students work out if they may be eligible for a subsidy on textbooks. Your customer has this requirement for the final interview screen:

Display the bookstore's address, but only if the student is eligible for the subsidy and the application date is after 1 January 2017.

Which three steps satisfy this requirement?

- A. Attach the visibility rule to the screen control containing the bookstore's address.
- B. Attach the visibility rule to the bookstore address attribute in the Data tab.
- C. Attach the attribute "the student is eligible for the subsidy" to the screen control containing the bookstore's address.
- D. Create an attribute containing the bookstore's address.
- E. Create an attribute rule concluding "the bookstore's address should be displayed" is true if "the student is eligible for the subsidy" and "the application date > 2017-01-01".
- F. Create a screen label containing the bookstore's address.

Correct Answer: DEF

QUESTION 5

Assuming that no relationship text has been manually defined or changed, what type of relationship is "all instances of the store"?

- A. a containment relationship with the employee as the target entity
- B. a containment relationship with Global as the target entity
- C. a reference relationship with the store as the target entity
- D. a containment relationship with the store as the target entity
- E. a self-referential relationship with the store as both the source and target entity
- F. a reference relationship with Global as the target entity

Correct Answer: B
