QUESTION 1

Your organization has specified that menu components should be located on the left-hand side of a page and that the main content should be displayed in the center. How do you ensure that developers adhere to this standard? (Choose the best answer.)

- A. Ask all developers to use the two-column quick start layout.
- B. Create a page template that defines the specified layout and distribute it to developers
- C. Create an ADF library that contains a collection of ADF Faces components that developers must use
- D. Create a task flow template that defines the specified layout; this will enforce the correct layout on all pages that are built from the template.

Correct Answer: B

QUESTION 2

Which three statements are true about `afpanelTabbed`? (Choose three.)

- A. Tab position can be only top or bottom.
- B. Content inside a tab can stretch horizontally.
- C. You can use icons instead of text on tabs.
- D. You can have only one disclosed tab at a time.
- E. You cannot have an `afpanelTabbed` component inside one of the tabs.

Correct Answer: BDE

QUESTION 3

Identify two statements that describe the benefits of using ADF to build web applications for mobile devices. (Choose two.)

- A. Mobile devices are supported by using native code.
- B. ADF code and applications are re-used.
- C. Separate applications are required for tablets and smart phones.
- D. ADF Faces components adjust to support touch gestures and layouts.
- E. Native mobile components are used to develop a user interface.

Correct Answer: BD

QUESTION 4

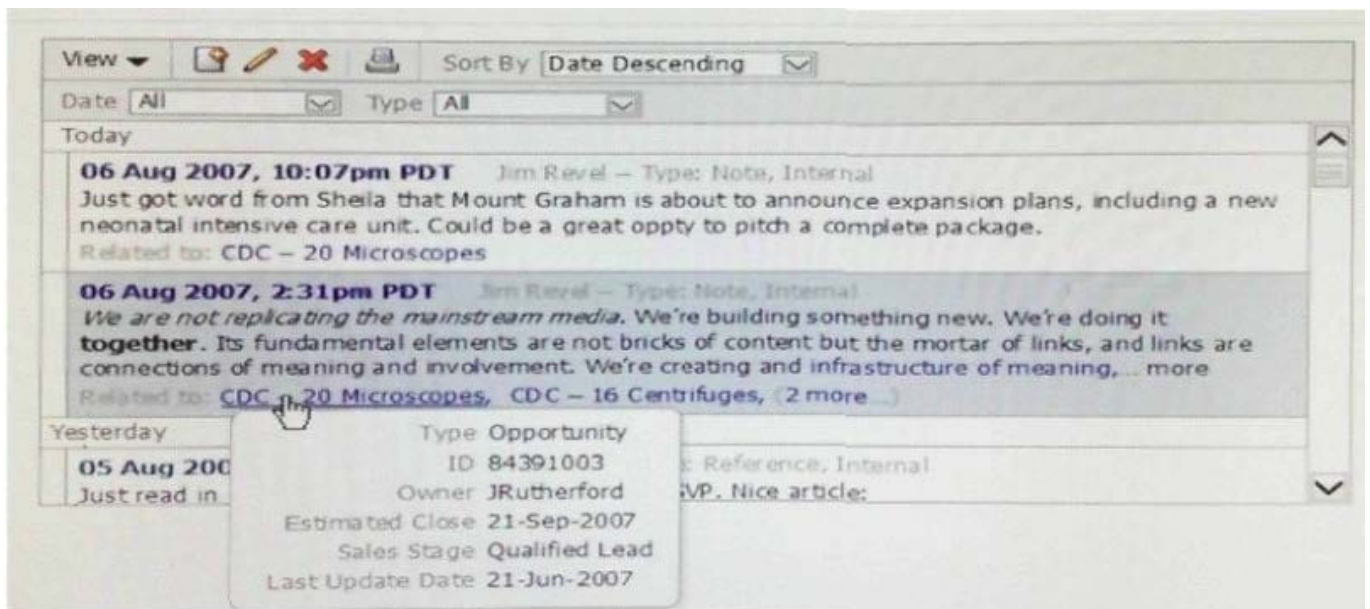

Which three statements are true about using a `dvt:map` component on a page? (Choose three.)

- A. You need to define a connection to a server that provides map images.
- B. You can use an exact street address to show a point theme.
- C. There is no way to display the distance between two points on a map.
- D. You can modify the icon used to represent a point on a map.

Correct Answer: A

QUESTION 5

View the Exhibit

How would you implement functionality to display product details in a separate window when users place their cursors over a link in the table? (Choose the best answer.)

- A. Create detail components in an `afpopup` component. Add `afshowPopupBehavior` to the link within the table and set the `PopupId` to the ID of the pop-up.
- B. Create detail components in an `afdialog` component. Add `afshowPopupBehavior` to the link within the table and set the `PopupId` to the ID of the dialog.
- C. Create detail components in an `afpopup` component. Add `afshowPopupBehavior` to the link within the table and set the `PopupId` to the ID of the pop-up.
- D. Create detail components in an `afpanelForm` component. Add `afshowPopupBehavior` to the link within the table and set the `PopupId` to the ID of the panel.
- E. Create detail components in an `afdialog` component. Add `afclientAttribute` elements to the link within the table. Create `afsetPropertyListener` component.

Correct Answer: C
