### QUESTION 1

To deploy an application, select the application drop-down and choose Deploy. In the resulting dialog box, select Deploy to EAR file to \_\_\_\_\_ or Deploy to Application Server to \_\_\_\_\_. (Choose the best answer.)

- A. create a file to deploy to using WLST or Ant scripts; deploy an application to a managed server
- B. deploy an application to a predefined application server; deploy a JAR file to a predefined application server
- C. create a file to deploy to a clustered server; deploy an application to a third-party application server
- D. deploy to the Integrated WebLogic server; deploy to a clustered server
- E. create a file to deploy to a clustered server; deploy an application using Enterprise Manager

Correct Answer: A

---

### QUESTION 2

Select three benefits that ADF Data Controls provide. (Choose three.)

- A. They abstract the UI developer from the technology used to implement business logic.
- B. They reduce the need to write managed beans.
- C. They automate Ajax updates to the UI.
- D. They enable drag-and-drop of data objects to UI component bindings.
- E. They directly connect your UI to the database tables.

Correct Answer: ABD

---

### QUESTION 3

Which statement is true about the difference between an Action binding and a methodAction binding? (Choose the best answer.)

- A. None; they are used interchangeably.
- B. An Action binding is a binding to a method defined in the business service exposed through a data control, whereas a methodAction binding is used to bin
- C. Both are bindings to methods defined in a business service, but an Action binding is used to bind to a UI component whereas a methodAction binding is 01
- D. Both are bindings to methods defined in a business service, but a methodAction binding is used to bind to a UI control whereas an Action binding is only a
- E. Action bindings are used to bind to built-in operations such as Create, Delete and Next, whereas a methodAction binding is used to bind to custom methoc

Correct Answer: E

---

#### QUESTION 4

You create a default entity object based on the Employees table, using the wizard and accepting the default settings. Which option represents the source file(s) that are typically created for you? (Choose the best answer.)

- A. Employees.xml
- B. Employees.xml and EmployeesImplJava
- C. Employees.xml and Employees.sql
- D. EmployeesDefImpl.java
- E. EmployeesDefImpl.xml

Correct Answer: A

---

#### QUESTION 5

You create a new ADF Faces page called emp.jsx and bind some data controls to that page. You notice a file called empPageDef.xml. What is this file for? (Choose best Answer)

- A. it is the page definition that contains the XML representation of the page layout and the components on that page.
- B. it is a template file into which you can write any managed bean code.
- C. it is the page template definition file that represents the chosen quick start layout.
- D. it is the file that contains the definition of the bindings to your data-bound components.
- E. it defines the binding context for all pages in your application.

Correct Answer: D
