**QUESTION 1**

Which two statements are true about an `af:panelStretchLayout` component? (Choose two.)

- A. a component placed in the center facet dynamically spaces out vertically to fill out the page height.
- B. if the top facet has more content than fits vertically, it automatically adds a vertical scroll bar.
- C. Facets without content in them do not show up at run time.
- D. Components placed in the center facet stretch to fill the horizontal space regardless of their containing layout container.
- E. You cannot include another `panelStretchLayout` component in the bottom facet.
- F. You can specify the vertical size for the top facet in pixels.

Correct Answer: AB

QUESTION 2

Which two statements describe the characteristics of an entity object? (Choose two.)

- A. An entity object represents a cache for records retrieved from the database.
- B. An entity object includes an `ORDER` clause to allow you to order the data in it.
- C. An entity object includes a `WHERE` clause to allow you to shape the data in it.
- D. Every column in a database table must be represented as an entity object attribute.
- E. An entity object definition is described in XML.

Correct Answer: AD

QUESTION 3

Consider the JSF managed bean code to execute a function in ADF Business Components via an `af:button` `actionListener` on a page:

```
public void doSomething(ActionEvent event) {  
  
    BindingContainer bindings = BindingContext.getCurrent().getCurrentBindingsEntry();  
    OperationMethod  
    method = bindings.getOperationBinding  
    ("appModuleMethod");  
  
    Map paramsMap = method.getParamsMap();
```

```
paramsMap.put(CsomeParameter,"someValue");  
  
method.execute();  
  
}
```

Which three options must be implemented for this code to work? (Choose three.)

- A. For the page definition file this code is called from, it must have a binding mapped to the ADF BC data control application module function
- B. For the page definition file this code is called from, it must have a binding mapped to the parameters of the ADF BC data control application module function.
- C. An AppModuleMethod function must exist in the ADF BC application module to call from the binding.
- D. An AppModuleMethod function must be exposed through the client interface editor of the ADF BC application module.

Correct Answer: ABC

QUESTION 4

Which three statements are true about afpanelTabbed? (Choose three.)

- A. Tab position can be only top or bottom.
- B. Content inside a tab can stretch horizontally.
- C. You can use icons instead of text on tabs.
- D. You can have only one disclosed tab at a time.
- E. You cannot have an afpanefabbed component inside one of the tabs.

Correct Answer: BDE

QUESTION 5

Which two are reasons why you might set the bind variables of a view object at run time programmatically rather than using the declarative features of the framework? (Choose two.)

- A. The framework can set only one bind variable declaratively on each view object query. Attempting to set more bind variables requires a programmatic solution.
- B. After a bind variable is set using the declarative method, its value is immutable unless updated programmatically.
- C. In all cases, ADF developers should code solutions rather than using declarative solutions
- D. The bind variable is derived by calling a Java method rather than receiving the value from a user.
- E. The bind variable value entered by and understandable by a user must be modified using Java code to a value that can actually be used in a query.

Correct Answer: BD
