QUESTION 1

A customer has a requirement to display BI reports on portal pages. What approach would you suggest?

- A. Develop a custom task flow to render BI data similar to an existing BI report.
- B. Add a BI folder that contains these reports to the Resource Catalog.
- C. Use a report URL in iFrame.
- D. Use Pagelet Producer to register a pagelet for each report.

Correct Answer: B

QUESTION 2

Which two options correctly describe how you can add Oracle BPM task flows to a portal page?

- A. You can add BPM task flows to any page if the portal contains BPM task flows in its resource catalog.
- B. You can add BPM task flows to the pages of a Process Space that was created by extending the domain with the Process Spaces domain extension templates.
- C. You can add BPM task flows to any page that you have customized to include BPM attributes.
- D. You can add BPM task flows to any page in a portal, if the portal server is installed in a SOA domain.

Correct Answer: BC

QUESTION 3

Your customer has configured Oracle Secure Enterprise Search (SES) with Oracle WebCenter Portal. The customer is complaining about the search results not including secured resources. The WebCenter

Diagnostic log file indicates the below error:

Received status "failed" during proxy login with application entity "weblogic" to Oracle SES at http://host:port/search/query/OracleSearch, as search user "vicki". Defaulting to public. Which three actions are necessary to resolve the issue?

- A. Confirm that Oracle SES is configured with an identity management system to validate and authenticate users.
- B. Confirm that WebCenter Portal and Oracle SES use different identity management systems (Active Directory or Oracle Internet Directory).
- C. All repositories (such as WebCenter Portal, WebCenter Content Server, and Oracle WebCenter Portal Discussions Server) must share the same user base as Oracle SES.

D. Oracle SES must have a trusted entity for allowing WebCenter Portal end users to be securely propagated at search time.

Correct Answer: BCD

QUESTION 4

You have to deploy a WSRP producer application for High Availability. Why should you add this setting to the weblogic.xml file? /appname REPLICATED_IF_CLUSTERED

- A. to enable support for replicating HTTP session state
- B. to enable ADF Controller to track changes to ADF memory scopes and replicate the page flow scope and view scope within the server cluster
- C. to enable ADF Business Components failover
- D. to enable ADF object replication

Correct Answer: C

QUESTION 5

Your customer requires that a particular user, Scott.Tiger, be a member of every portal created in WebCenter Portal.

How do you achieve this?

- A. Plug in additional code to add the user during portal creation.
- B. You should not do this. This is a security breach and only moderators should add members.
- C. Uses WebCenter Portal REST or Web Services to achieve this.
- D. Use a portal template that contains the user as the member.

Correct Answer: C
