### QUESTION 1

How do you share a navigation model between multiple portals?

- A. Create a navigation model at one of the portals and share that with the other portals.
- B. Within each portal, make a copy of the desired navigation model.
- C. Create a shared navigation model at the global level and modify each portal's setting to use the shared navigation model.
- D. This is not possible.

Correct Answer: B

---

### QUESTION 2

The DesignWebCenterSpaces application contains a file called config.properties. What is the purpose of this file?

- A. To enable a connection between JDeveloper and the Portal server. This will be used to upload and download assets directly from JDeveloper.
- B. It allows the developer to configure which asset types can be created or edited with this application.
- C. It is used to store classpath and library information, and the path to executables. That way, a local Portal instance can be started from JDeveloper.
- D. It is an internally used file. Developers should not have to manually configure this file, except when required by Oracle to do so.

Correct Answer: A

---

### QUESTION 3

Which is true for portals created in the WebCenter Portal 11.1.1.8 version?

- A. A new portal created in 11.1.1.8.0 references a global default navigation model.
- B. A new portal created in 11.1.1.8.0 contains a local navigation model.
- C. A new portal created in 11.1.1.8.0 contains a local read-only navigation model.
- D. A new portal created in 11.1.1.8.0 does not contain any navigation model.

Correct Answer: B

---

### QUESTION 4

What are the three ways to export Portal from a source environment A and import it to the target environment B?

- A. Create a portal library jar file from Portal Builder Admin and export it from environment A and import it in environment B.
- B. Create a portal library zip file from Portal Builder and export it from environment A and import it in environment B.
- C. Create a par file from Portal Builder and export it from environment A and import it in environment B.
- D. Use WLST exportWebCenterPortals and importWebCenterPortals commands to export and import archives.
- E. Use WLST propagateWebCenterPortals and deployWebCenterPortal after having established a direct connection between A and B.

Correct Answer: ACD

---

### QUESTION 5

You created a portlet, and you need to get the user role inside one of the beans for the portlet. Users and roles are fetched from Lightweight Directory Access Protocol (LDAP). Which command should you use to check the role for a particular user?

- A. RenderRequest.getUserRole()
- B. PortletRequest.getUserRole()
- C. PortletRequest.isUserInRole()
- D. RenderRequest.isUserInRole()

Correct Answer: C
