QUESTION 1

How do you share a navigation model between multiple portals?

- A. Create a navigation model at one of the portals and share that with the other portals.
- B. Within each portal, make a copy of the desired navigation model.
- C. Create a shared navigation model at the global level and modify each portal's setting to use the shared navigation model.
- D. This is not possible.

Correct Answer: B

QUESTION 2

Which two scoped managed beans must be Serializable in order to work without errors in a highly available application?

- A. Session scope
- B. Backing bean scope
- C. View scope
- D. Transient scope

Correct Answer: BC

QUESTION 3

After a task flow has been deployed as a new shared library, which step is required in the portal extension project to make this task flow visible from WebCenter Portal?

- A. Update only weblogic.xml.
- B. Update only MANIFEST.MF.
- C. Update both files.
- D. None, because a shared library is used.

Correct Answer: C

QUESTION 4

Which three asset types are used to define the layout and the look and feel of the portal?

- A. Skins
- B. Page Styles
- C. Content Presenter Templates
- D. Task Flow Styles

Correct Answer: BCD

QUESTION 5

Which option correctly describes the relationship between WebCenter Portal and ADF?

- A. ADF is the development framework in which WebCenter Portal is based, and also the framework recommended for custom development (of portlets, taskflows, and templates).
- B. ADF is the development framework recommended for taskflow development. WebCenter Portal has an ADF integration gateway to support ADF taskflows.
- C. ADF is the integration layer for WebCenter Portal. All communication with external applications is done through ADF standards.
- D. ADF is an architectural concept for developing web applications using an MVC (model-view- controller) framework. ADF has a set of models that can be used to speed up development time.

Correct Answer: C
