QUESTION 1

Which two statements are correct about the Oracle Enterprise Scheduler Service (ESS) facility?

- A. It is a Java EE application that is deployed to WebLogic Server to provide distributed job request processing across a single WebLogic Server or a collection of WebLogic Servers.
- B. It is shipped as a separate product and you can install it after you have completed the SOA Suite installation.
- C. It is used extensively by Fusion Applications so it is well-tested.
- D. It is administered via the WebLogic Server Administration Console.

Correct Answer: AD

QUESTION 2

A user has configured Mediator M1 to receive and route product information from System X into its internal applications in chronological order. For each product, M1 receives one "create" event followed by any number of "update " events from an AQ Queue via a JMS adapter. M1 can receive updates to the product at any time of day.

The user claims that incoming messages for each product are received and processed in the correct chronological order 95 % of the time. However, the messages are being processed out of order 5 % of the time. This results in critical errors in the target systems. The user expects all messages pertaining to a product to be unconditionally processed in the order of arrival at M1.

What causes this discrepancy?

- A. The user is running on a four-node SOA cluster and has not configured the inbound JMC adapter to be a singleton.
- B. The user is running on a single-node SOA environment but has configured the number of inbound adapter threads to be a value greater than 1.
- C. The given Mediator configuration does not address this sequencing requirement.
- D. The user has configured resequencer worker threads to a value greater than 1 for the Mediator service engine.

Correct Answer: C

QUESTION 3

Which two statements are true about the role of a Continuous Query Language (CQL) processor in a Oracle Event Processing application?

- A. It primarily executes SQL statements against the database.
- B. It can be used to filter, aggregate, and correlate events in memory and can integrate with Coherence, NoSQL, and HDFS.
- C. It invokes human workflows to deal with exception handling.

D. It can perform spatial queries as well as complex

Correct Answer: AC

QUESTION 4

As an Oracle SOA Suite composite moves through the software development life cycle, certain environment-specific changes must be made to the composite configuration from deployment to deployment.

Which feature can help you capture and effect these changes?

- A. Configuration Plans
- B. Deployment Plans
- C. Domain Value Maps
- D. Property Files

Correct Answer: A

QUESTION 5

Which statement is correct about how if-then rules are processed during an inferencing session?

- A. Rules are evaluated in the order in which they were added to the ruleset.
- B. A particular rule can be fired only once in an inferencing session.
- C. The effective date set for a rule can take it out of consideration for evaluation.
- D. A priority setting of 1 will cause the rule to fire during each inferencing session.
- E. Rules with multiple IF conditions receive higher priority during evaluation.

Correct Answer: A
