QUESTION 1

When designing an integration with an ERP system, you need to communicate with a third party integration tool (such as a middleware or a hub). Which two statements are true about a middleware in this scenario?

A. The third party tool cannot be configured to modify the XML for better communication.

B. The third party tool can transform incoming XML as well as outgoing XML when it comes to communicating with applications.

C. A request from BigMachines can reach the ERP system even if there is an error in processing the request with the third party tool.

D. A third party tool calls BigMachines to get valid authentication.

E. BigMachines needs to pass any necessary authentication to the third party tool.

Correct Answer: CD

QUESTION 2

Your customer has both Salesforce and CPQ Cloud and would like to achieve the following:

-Select one parts master to hold all of the parts data.

-Provide the ability to upload and download parts data.

-Have a corresponding price book entry to each part.

-Ensure that the parts are available for currently integrated external systems.

-

Ensure that the parts data is available for reporting to the entire product development team, without purchase of extra licenses of CPQ Cloud. Based on these requirements, which two options would you choose to design and implement the parts master?

A.

Store all the parts data in Salesforce and use the Salesforce Daata Loader tool to upload and download the parts data.

B.

Use the Salesforce price book and reporting and use the integration APIs to make all the parts data available for use in other external systems that are integrated with Salesforce.

C.

Store the parts data in CPQ Cloud and use the Bulk Data service to upload and download the parts data. Use the price book entries for each part.

D.

Integrate each external system with CPQ Cloud on client approval. purchase the reporting capability for your CPQ Cloud site.

Correct Answer: AC
