QUESTION 1

How should administrator set up a conditional restriction for access to a Product Family?

A. by providing conditional access criteria in the Restricted Access section of the Home Page setup

B. by writing a Constraint rule at the Product Family level

C. by hiding the model punch-in on the home page by using JavaScript

D. by setting up a restricted profile and user group in Commerce and Hiding the add, reconfigure, and delete product options

Correct Answer: A

QUESTION 2

Your client requires configurators with 400 configurable attributes that don\\'t need to be selected in a specific order and the client is concerned about page load time. How would you utilize Configuration Flows to provide an optimal user experience?

A. Use CSS to hide irrelevant attributes during selection.

B. Use tabs to display attributes.

C. Display attributes using a multi-node config flow.

D. Display attributes on one tab in groups.

Correct Answer: C

QUESTION 3

While designing the integration of a BigMachines quote with an external Order Management System, you need to make sure that the quote is submitted as an Order on a single-action-click from within BigMachines. Which three statements are true given this requirement?

A. The Order Management System will perform a getTransaction() API call to fetch quote data in response to a valid request from the BigMachines quote.

B. TransactionID of a quote is a key during the Order submission process.

C. The BigMachines quote will perform an updateTransaction() API call to send quote data in response to a valid request from the Order Management System.

D. The BigMachines quote will initiate the Submit Order call on the click of a button from the quote.

E. The Order Management System will need to initiate the Submit Order call on the click of a button within its own system.

Correct Answer: CDE

QUESTION 4

You want to run a Constraint rule only when an action is performed by a user. Which two options are true?

A. Constraint rules are Ajax-based and there is no option to disable Ajax in Commerce rules.

B. You can implement the requirement by invoking the Constraint rule from the action.

C. You can use Validation rules because it better serves the purpose.

D. You can implement the requirement by using a timer.

Correct Answer: BD
