QUESTION 1

Identify two Unifier login fields that you must complete to import a workflow setup from another environment. (Choose two.)

- A. Authentication Key
- B. Company Short name
- C. Author
- D. Search for

Correct Answer: AB

QUESTION 2

You are making changes to users in Groups in a shell. You use the Import User Groups Assignments File functionality to complete this task. You identify two errors during this update process for two users.

What are two reasons for the errors? (Choose two.)

- A. The user and Company combination is not valid.
- B. The Group name on the import file is not a valid Group in the Shell.
- C. Permissions are not valid for the Shell.
- D. Partner Companies do not exist within the Shell.
- E. Scheduled import conflicts with scheduled export process.

Correct Answer: BC

QUESTION 3

You are building a workflow and specifying conditional routing. There are multiple conditions that must be met.

How do you do this?

- A. Set up a Form with a drop-down menu.
- B. Set up an Or operator.
- C. Set up an And operator.
- D. Set up a Data Picker.

Correct Answer: A

QUESTION 4

When a Program is created, a Program Administrators Group is automatically created. Who is the default member of that Group?

- A. the user who has been entered as an administrator
- B. the creator of the Program
- C. the System administrator
- D. the Company administrator

Correct Answer: D

QUESTION 5

You are an administrator supporting a specific Shell. You have been asked to report on named users assigned to specific Groups within that Shell for a management review. You use the Export User Group Assignment File functionality to complete this task.

However, while reviewing this report, you inadvertently notice that some of the users have not been exported in this report.

What is the reason for this?

- A. The users are On Hold.
- B. The users do not have an email address.
- C. The users are not assigned to Groups.
- D. The users have no permissions assigned.

Correct Answer: A
