QUESTION 5

Your client wants its website to support multiple channel delivery. The client has new requirements:

- 1.The web pages should rearrange themselves for smaller devices and/or browser size and/or orientation.
- 2.Editors do not need to do anything more or learn anything new than what they do or know currently, with regard to their current 1024-pixel-wide website.
- 3.The client wants to keep the amount of code testing to a minimum.

Which solution best meets these requirements?

- A. Create multiple instances of Article assets, one each for the type of device that you want to support, and assign them the appropriate template.
- B. Create multiple instances of responsive templates, one each for the type of device that you want to support, by using namespaces to distinguish between them at request time.
- C. Install multiple WebCenter Sites delivery environments, one each for the type of devices that you want to support.
- D. Refactor your existing templates by using the open source CSS and JavaScript libraries to enable responsive behaviors.
