QUESTION 1

A customer has a requirement to contribute content to the management environment (Server M) and make this content available to the live environment (Server P). The customer has decided to use the publishing functionality to accomplish this requirement.

Which statement best reflects the configuration that is required?

A. Create a publish destination with the RealTime delivery type, configure a batch user on Server M, and configure a RealTime user on the target Server P.

B. Create a delivery type of Dynamic Publish, assign this delivery type to a publish destination on Server M, and create a batch user for both Server M and Server P.

C. Create a publish destination with the RealTime delivery type, create a batch user on Server M, and enter the RealTime username and password in the publish destination entry form. The RealTime user must have appropriate privileges for both the source Server M and the target Server P.

D. Create a publish destination with the RealTime delivery type, create a batch user with appropriate privileges for Server M, and create a RealTime user with appropriate privileges for the target Server P.

Correct Answer: C
