QUESTION 1

Whether from new/changing business requirements or technical optimizations, your Services are bound to change and evolve over time. The lack of a Service versioning strategy will greatly impact the flexibility of your SOA initiative as it will severely hinder Service evolution. Which three principles should be part of a Service versioning strategy?

- A. Service providers must be able to release new versions into production without waiting for consumers to certify on them.
- B. A new version of a Service must be developed using the same technology (for example, Java) that the original Service was developed in.
- C. Concurrent versions of a Service must always be deployed on the same physical server.
- D. Service consumers should not require code modifications in order to access the latest compatible Service versions.
- E. Consumers must be able to test and certify on new Service versions before switching to the new version in production.

Correct Answer: BCE

QUESTION 2

After having success in your SOA initiative across a single line of business, management wants you to deploy SOA across the enterprise in a cost effective and expedited manner. Your primary concern is that not all of your organization's line of businesses has enough developers with the knowledge and experience to develop Services. Which course of action do you apply to address this concern?

- A. Allow each line of business to hire external consultants to develop Services
- B. Implement a shared resource service factory
- C. Send all line of business developers on a service engineering course
- D. Implement an enterprise service factory

Correct Answer: A

QUESTION 3

A unit test case aims to test two of the components from the Service model. What are these components?

- A. Implementation
- B. Interface
- C. Contract
- D. Service Agreement

E. Business Process

F. Composite Service

Correct Answer: BD

QUESTION 4

With an hourly burden rate of \$100 and at least 7 opportunities for reuse, what is the potential reuse monetary value of a SOA Service that has a predicted net hours saved of 225 hours?

A. \$15,750

B. \$22,500

C. \$225,000

D. \$157,500

E. \$382,500

Correct Answer: D

QUESTION 5

Which statement describes the purpose of a Service portfolio?

A. A Service portfolio provides a single location for storing Service meta-data, software relationships, and metrics in order to apply governance policies and systemetise reuse.

B. A Service portfolio provides a singlesoftware library from which artifacts can be deployed and versioned.

C. A Service portfolio provides a runtime view of the Services so that the right Service may be looked up and consumed in an environment.

D. A Service portfolio contains all the software artifacts that will be developed by a project so that project managers can track their lifecycle through the project.

Correct Answer: D
