### QUESTION 1

Which additional cookie needs to be cleared out on performing centralized logout when a Detached Credentials Collector is used in Oracle Access Manager with 11g WebGates?

- A. ObSSOCookie
- B. DCCCtxCookie
- C. \_WL\_AUTHCOOKIE\_JSESSIONID
- D. iPlanetDirectoryPro

Correct Answer: B

---

### QUESTION 2

You have defined an application and its associated policies in Oracle Entitlements Server (OES) to protect your customer's banking application. This application is written in Java and deployed on WebLogic, using the WebLogic security module for integration. Using the policy simulator, your policy logic appears to be correct.

However, while testing, it appears that your authorization policies are not being applied and all authorization decisions are being returned as false from the security module.

Which two configuration settings in your OES admin console may be the cause if this problem? (Choose two.)

- A. The security module is configured to pull policies instead of having policies pushed to it.
- B. The application has not been associated with the security module in the OES admin console.
- C. The security module was not registered correctly when config.sh was run.
- D. You have not distributed the policies in the OES admin console.
- E. The security module has not been started.

Correct Answer: BD

---

### QUESTION 3

Identify two ways in which you can specify trusted Identity Provider (Idp) partners while configuring Service Providers (SP) in Oracle Access Management Identity Federation.

- A. Manually create a new Idp configuration and fill the form with all attributes.
- B. Import the metadata file generated from an Idp deployment to create a new Identity Provider configuration.
- C. Automatic discovery of an Idp populates the configuration data.
- D. A request can be broadcast to all IdPs and the one that matches returns its configuration data is populated.

E. A sample XML configuration file is provided, which needs to be modified, and the Server needs to be restarted.

Correct Answer: AB

---

#### QUESTION 4

Identify two protocols that the Oracle Access Management Social module supports for Authentication and Authorization using Internet Identity services. (Choose two.)

- A. OpenID
- B. WebID
- C. BrowserID
- D. Windows Live ID
- E. OAuth

Correct Answer: AE

---

#### QUESTION 5

When defining an attribute on the Relying Party Partner Profile in Security Token Service, which three types of attribute sources are supported?

- A. User Store (LDAP)
- B. CSV File
- C. Incoming Token Data
- D. XML File
- E. Static Value
- F. User Store (Oracle Identity Analytics ?Identity Warehouse)

Correct Answer: ACE
