QUESTION 1

Identify three functions of the OSM Task Web client.

A. It enables order processing personnel to monitor and manage tasks within an order and to ensure that all associated tasks are completed.

B. It enables order fallout managers to diagnose and manage the order fallouts associated with an order.

C. It enables users to associate roles or workgroups with task and manually complete the activities associated with those tasks.

D. It enables users to monitor email notifications and handle them through acknowledgement, escalation, and forwarding to other users.

E. It enables users to suspend and resume orders, cancel orders, and create orders manually.

Correct Answer: ABE

QUESTION 2

You are designing a new fulfillment process for VPN sites for a communications service provider that wants to select manually if the supply chain activity should be executed or not. Considering that your implementation includes a manual task, which two options can you use to fulfill your client\'s request?

A. defining multiple statuses in the manual task

B. designing different flow branches from the manual task

C. adding an automator to the manual task

D. adding a rule to the manual task

E. assigning multiple roles to the manual task

Correct Answer: BD

QUESTION 3

You detect some performance issues during the execution of a load test in an environment that will be used to fulfill a large number of orders in a given day. Which three resources should you check and reconfigure in your Oracle WebLogic Server console in order to provide better performance to this environment?

A. database connections

B. threads

C. users and groups

D. JMS queues

E. deployments

Correct Answer: ABD

---

QUESTION 4

Identify two mandatory properties that you must define when modeling an order item specification.

A. the property that indicates the order item name displayed on the Order Management Web client

B. the property that indicates what product specification is assigned to an order item

C. the property that indicates what product class is assigned to an order item

D. the property that indicates the delivery date requested for an order item

E. the property that stores the XML payload received when an order is created and associated with an order item

Correct Answer: BD

QUESTION 5

The following function is called in an XQuery automation plug-in before performing a logic that you have developed. Identify the functional action that would be executed with the output of this code.

```
declare function local:getCredential(
    $map as xs:string,
    $key as xs:string,
    $context as javatype:com.mslv.oms.automation.OrderContext)
    as element ()*
{
    let $credential :=
        context:getCredentialAsXML ($context, $map, $key)
    return $credential/oms:Credential
}
```

A. Authenticate with a southbound interface.

B. Receive responses from a JMS queue.

C. Publish messages to a JMS queue.

D. Communicate with another running order in the same OSM instance.

E. Check the users that are running tasks in the current order.

Correct Answer: D
