QUESTION 1

There is an issue booting into a virtual machine. The log files show that there is an issue during the Linux boot process of the guest. What two methods will best help determine the problem?

- A. Use xm console to attach to the guest while it is booting and look for the specific error.
- B. Run xm dmesg to see hardware errors in the guest.
- C. Run xm info to see the list of devices being attached to the virtual machine.
- D. xm block-attach the disk to another virtual machine to inspect the file system and check module loading issues.

Correct Answer: AB

QUESTION 2

What requirements apply to shared storage on an HA Server Pool?

- A. Each server in the pool must have a connection to the shared storage, using NFS, iSCSI or a SAN. Either ext3 or OCFS2 should be used to format the shared file system.
- B. Each server in the pool must have a connection to the shared storage, using NFS, (SCSI or a SAN. Either gfs or OCFS2 should be used to format the shared file system.
- C. t least one server in the pool must have a connection to the shared storage, using iSCSI or a SAN. Either ext3 or OCFS2 should be used to format the shared file system.
- D. Each server in the pool must have a connection to the shared storage, using iSCSI or a SAN. Only OCFS2 should be used to format the shared file system when using iSCSI or a SAN.
- E. Each server in the pool must have a connection to the shared storage, using NFS, iSCSI or a SAN. Only OCFS2 should be used to format the shared file system when using iSCSI or a SAN.

Correct Answer: E

QUESTION 3

When converting hardware virtualized machine to full PV, the guest falls to boot. What line in vm.cfg is likely leftover from the HVM configuration?

- A. vnclisten = '\\0.0.0.0\\'
- B. pae =1
- C. builder='\\hvm\\'

D. serial=\\'pty\\'

Correct Answer: C

Explanation:

My suggestion is to use builder=\\'hvm\\' because it works fine for once I have failed to booting the server but when I made it builder=\\'hvm\\' it booted fine. Another thing is if you use linux os as a mother os then you can leftover this builder=\\'hvm\\' but if you use windows2003 then you have to use builder=\\'hvm\\'.

QUESTION 4

What does tools are available from Oracle that best describe virtual machine performance of a virtual machine?

- A. xm list
- B. oswatcher installed in the guests
- C. top
- D. xm top
- E. cat /proc/cpuinfo

Correct Answer: D

QUESTION 5

What two benefits can be derived from having multiple utility servers?

- A. A second utility server can provide a backup in case the main utility server dies.
- B. Only one utility server is allowed per server pool.
- C. A second utility server can be configured to switch to a Server Pool Master role if no more ServerPool Masters are available.
- D. A second utility server can help load balance high I/O loads.
- E. A second utility server is only needed if HA is turned on. In that case, it can provide a backup in case the main utility server dies

Correct Answer: CD
