### QUESTION 1

Thomas has created an app and wants to add a help icon to the navigation bar. He has added the list entry with the Image/Class fa-question-circle-o and List Entry Label "Help". When he runs the app, the question mark is displayed together with the word Help.

How can Thomas display just the icon and not the word Help in the navigation bar?

- A. Set List Attributes to style="display:none;"
- B. Set List Entry Label to "Null"
- C. Set User Defined Attribute 02 to icon-only
- D. Set List Entry Template to "Icon"

Correct Answer: C

### QUESTION 2

Jim has developed a form page. When running the page, the data displayed is not what he expected. Therefore, he wants to review the information in session state while debugging the form.

How can Jim accomplish this?

- A. View page source information in the browser.
- B. Click the Session button on the Developer toolbar.
- C. Add a debug flag to the URL and rerun the page.
- D. Click the View Debug button on the Developer toolbar.
- E. Edit the page and update session state items to "Display Only".

Correct Answer: D

### QUESTION 3

Sunny has developed a report and form on CUSTOMERS, which is open to partners. The report displays only customers associated with partners, based on their user credentials. Partners can click an Edit button to go to a form page to update their customers. Sunny is concerned that IT savvy users will be able to alter the URL to be able to see and update records from other partners.

What must Sunny do to protect the form page from URL tampering?

- A. Update Page Access Protection to Arguments Must Have Checksum
- B. Set Authentication to Administration Rights
- C. Set Rejoin Sessions to Disabled
- D. Set Deep Linking to Disabled
- E. Update Page Access Protection to No URL Access

Correct Answer: E

#### QUESTION 4

In Application Express, how do you enable a database schema assigned to the current workspace so that it can be used to serve ORDS-based RESTful Services?

- A. Install the Sample REST Services packaged application.
- B. Navigate to the Shared Components section and configure a REST Enabled SQL resource.
- C. Navigate to the ORDS RESTful services section of SQL workshop, select the appropriate schema, and click the "Register Schema with ORDS" button.
- D. Navigate to workspace administration and in the Set Workspace Preferences section, set Enable RESTful Services to "Yes".

Correct Answer: C

Reference: <https://docs.oracle.com/en/database/oracle/application-express/19.1/aeutl/accessing-RESTfulservices.html#GUID-DE5D8763-A650-4FBA-9CC5-17E141C8406C>

#### QUESTION 5

Kevin has been asked to create a percentage bar chart that shows what percentage of project were over budget and under budget. Initially his chart looks like.

However, he wants the chart to look like.

What chart attribute should Kevin change to fix this display issue?

- A. Combine Series = Yes
- B. Chart Type =Percent
- C. Fill Gaps in Chart Data + Yes
- D. Stack = Yes

Correct Answer: D
