QUESTION 2

ABC Company developed an employee directly by using an interactive report.

The HR manager (an end user) has customized his or her report to show only employees in the HR department, and wants to review the same report weekly.

How can the HR manager achieve this?

- A. Add a control break on Department
- B. Add a filter to the report
- C. Save the report as a named report
- D. Save the report as the primary report
- E. Download the report to a CSV or HTML file

Correct Answer: D

QUESTION 3

Robert has a form page, Page 5, on the EMP table. He has defined two validations.

1.

Validation 1 checks that P5_MGR is not null.

2.

Validation 2 checks that the employee selected in P5_MGR has a job of PRESIDENT or MANAGER.

How can Robert prevent the employee job validation (Validation 2) from firing when the P5_MGR is NOT NULL validation (Validation 1) has failed?

- A. Set stop processing to Yes for the P5_MGR is NOT NULL validation (Validation 1)
- B. Ensure Validation 1 is listed before Validation 2
- C. Add a server-side condition of P5_MGR is NOT NULL to the employee job validation (Validation 2)
- D. Set Always Execute to No for the P5_MGR employee job validation (Validation 2)

Correct Answer: C

QUESTION 4

Jason has developed an app for maintaining customers. He has a navigation menu for customers that he needs to associate with multiple pages.

How can Jason associate one list entry with multiple pages?

- A. Set List Entry Current for Pages Type to "Comma Delimited Page List."
- B. Update the list entry User Defined Attribute 01 to "MULTIPLE", and User Defined Attribute 02 to the list of pages.
- C. Update each page and set Current Navigation Menu Entry to "Customers".
- D. Add additional list entries labeled Customers.
- E. Update list entry Condition Type to "Current Page Is Contained Within Expression 1 (comma delimited list of pages)."

Correct Answer: E

QUESTION 5
