QUESTION 1

You use AppToCloud to migrate an on-premises WebLogic Server 11g domain to Oracle Java Cloud Service. This on-premises domain is not enabled for Java Required Files (JRF). Which statement is true about the resulting service instance?

A. The service instance is running WebLogic Server 11g and does not include JRF.

B. AppToCloud cannot be used to migrate this on-premises domain.

C. The service instance is running WebLogic Server 12c and includes JRF.

D. The service instance is running WebLogic Server 11g and includes JRF.

E. The service instance is running WebLogic Server 12c and does not include JRF.

Correct Answer: C

QUESTION 2

You can use Java and REST APIs for caching applications to interact with Oracle Application Container Cloud Service caches. Which two client protocols does Oracle Application Container Cloud Service (ACCS) Cache support? (Choose two.)

A. http

B. grpc

C. thrift

D. avro

Correct Answer: AB

QUESTION 3

You want to collect and analyze performance characteristics of your Java application.

Which action correctly accomplishes this?

A. Use REST API to collect JFR data for the last 1 minute.

B. ssh into the application VM to collect JVM heap dump.

C. Collect JFR data for the last 1 hour using the UI.

D. Use the PSM CLI to collect heap dump.

Correct Answer: D

QUESTION 4

PSM CLI is a command line utility for managing PaaS services on Oracle Cloud.

What is the command psm accs push used to accomplish?

A. delete an application

B. create or update an application

C. scale out an application

D. restart an application

Correct Answer: B

QUESTION 5

Which two statements about backups in Oracle Java Cloud Service are false? (Choose two.)

A. Java Cloud Service can disable backups automatically after a failure.

B. Java Cloud Service backs up the WebLogic Server software installation.

C. You cannot perform a scaling operation while a backup operation is in progress.

D. On-demand backups are always incremental backups.

E. Java Cloud Service backs up the WebLogic Server domain configuration.

F. You can customize the schedule at which Java Cloud Service automatically takes backups.

Correct Answer: CD
