-  **800,000+** Satisfied Customers

QUESTION 1

Autonomous Exadata Infrastructure Maintenance

Exadata infrastructure maintenance takes place at least once each quarter and is mandatory. You can schedule a maintenance window to control the time, day of the week, and week of the month for Exadata infrastructure maintenance. Exadata infrastructure maintenance patches the Exadata infrastructure (including patching of the Exadata grid infrastructure code and operating systems updates), and do not include database patching. Oracle notifies you about upcoming Exadata infrastructure maintenance in the weeks before quarterly Exadata infrastructure patching occurs. You can also view scheduled maintenance runs in the Oracle Cloud Infrastructure console. The following tasks explain how to view scheduled and past maintenance updates, and how to edit the maintenance schedule for an Exadata infrastructure instance:

- [To configure the automatic maintenance schedule for an Autonomous Exadata Infrastructure resource](#)
- [To view the next scheduled maintenance for an Autonomous Exadata Infrastructure resource](#)
- [To view the maintenance history of an Autonomous Exadata Infrastructure resource](#)

You can use the [GetMaintenanceRun](#), [ListMaintenanceRun](#), and [UpdateAutonomousExadataInfrastructure](#) API operations to view details about scheduled and past maintenance updates, and to update the maintenance schedule of your infrastructure instance.

Which stage of the indexing pipeline divides text into tokens?

- A. SECTIONER
- B. FILTER
- C. Otokenizer
- D. LEXER

Correct Answer: D

QUESTION 2

Which Autonomous Database Service is NOT used to connect to an Autonomous Transaction Processing instance?

- A. TPPERFORMANT
- B. MEDIUM
- C. HIGH
- D. LOW
- E. TPURGENT

Correct Answer: A

<https://docs.oracle.com/en/cloud/paas/atp-cloud/atpug/manage-priorities.html#GUID-80E464A7-8ED445BB-A7D6-E201DD4107B7>

QUESTION 3

When running lots of high concurrent queries in Autonomous Database, you should use which predefined service connection?(Choose the best answer.)

- A. DBNAME_MEDIUM
- B. DBNAME_HIGH
- C. DBNAME_CONCURRENT
- D. DBNAME_LOW

Correct Answer: D

<https://docs.oracle.com/en/cloud/paas/autonomous-data-warehouse-cloud/user/managepriorities.html#GUID-80E464A7-8ED4-45BB-A7D6-E201DD4107B7>

QUESTION 4

While creating a business model what advanced options you can enable or disable? (Choose three)

- A. Business Object Security Feature
- B. Analytic View Transparency View
- C. Autonomous Aggregate Cache
- D. Display private tables
- E. Analytic View Base Table Query Transformation

Correct Answer: BCE

Creating and Editing Business Models

From the Business Models page, you can create a business model and view information about it. You can also edit a business model and perform other actions on it.

When you create a business model, you identify a fact table that contains the data to inspect. The Business Model creation tool looks at the contents of that table, identifies any hierarchies in the fact table, and searches for other tables that may contain related hierarchies. It then suggests a business model to which you can make any desired adjustments.

While creating a business model, you can enable or disable the following advanced options:

- Autonomous Aggregate Cache, which uses the dimensional metadata of the business model to manage a cache and can improve query response times.
- Analytic View Transparency Views, which presents analytic views as regular database views and enables you to use your analytic tools of choice while gaining the benefits of analytic views.
- Analytic View Base Table Query Transformation, which enables you to use your existing reports and applications without requiring changes to them.

QUESTION 5

During the provisioning of an Autonomous Database on Dedicated hardware, what does the Database Administrator need to select to determine where the Autonomous Database is created on the Dedicated infrastructure?

- A. the name or OCID of the Exadata infrastructure which was assigned by the the Fleet Administrator
- B. the Client Credentials wallet which is used to connect to the Autonomous Database
- C. the '\\High Availability Container Database\\' in which the Autonomous instance should run
- D. the Compartment of the Dedicated infrastructure as each compartment only runs 1 Dedicated environment
- E. the Listener endpoint where the Autonomous Database should register on

Correct Answer: C

https://docs.oracle.com/en-us/iaas/Content/Database/Tasks/adb_dedicated_creating.htm
