100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Oracle  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

## QUESTION 1

Which three statements are true about procedures in the DBMS\_CLOUD package? (Choose three.)

- A. The DBMS\_CLOUD.PUT\_OBJECT procedure copies a file from Cloud Object Storage to the Autonomous Data Warehouse.
- B. The DBMS\_CLOUD.CREATE\_CREDENTIAL procedure stores CloudObject Storage credentials in the Autonomous Data Warehouse database.
- C. The DBMS\_CLOUD.VALIDATE\_EXTERNAL\_TABLE procedure validates the source files for an external table, generates log information, and stores the rows that do not match the format options specified for the external table in a badfile table on Autonomous Data Warehouse.
- D. The DBMS\_CLOUD.DELETE\_FILE procedure removes the credentials file from the Autonomous Data Warehouse database.
- E. The DBMS\_CLOUD.CREATE\_EXTERNAL\_TABLE procedure creates an external table on files in the cloud. You can run queries on external data from the Autonomous Data Warehouse.

Correct Answer: BCE

### DELETE\_FILE Procedure

This procedure removes the specified file from the specified directory on Autonomous Data Warehouse.

### CREATE\_CREDENTIAL Procedure

This procedure stores Cloud Object Storage credentials in the Autonomous Data Warehouse database.

Use stored credentials for data loading or for querying external data residing in the Cloud.

### PUT\_OBJECT Procedure

This procedure copies a file from Autonomous Data Warehouse to the Cloud Object Storage. The maximum file size allowed in this procedure is 5 gigabytes (GB).

**VALIDATE\_EXTERNAL\_TABLE Procedure** This procedure validates the source files for an external table, generates log information, and stores the rows that do not match the format options specified for the external table in a badfile table on Autonomous Data Warehouse. **CREATE\_EXTERNAL\_TABLE Procedure** This procedure creates an external table on files in the Cloud. This allows you to run queries on external data from Autonomous Data Warehouse.

To use Data Pump from ADB, a credential identifying the Object Storage bucket to use must be defined with a DBMS\_CLOUD.CREATE\_CREDENTIAL function. This will allow ADB to access objects that are stored in the object store, including dump files. To export an existing database to prepare for import into ADB, use the XTP command and add the exclude option for database functionality that is not recommended or supported in ADB. This will prevent errors during the import process. This process is not automatic. And if the logs are not moved, you will receive a warning when running the MDB that the logs are not there. In this example, we're moving the log import.log to object store with a DBMS\_CLOUD.PUT\_OBJECT command.

**VALIDATE\_EXTERNAL\_TABLE Procedure** This procedure validates the source files for an external table, generates log information, and stores the rows that do not match the format options specified for the external table in a badfile table on Autonomous Database. The overloaded form enables you to use the operation\_id parameter. **PUT\_OBJECT Procedure** This procedure copies a file from Autonomous Database to the Cloud Object Storage. The maximum file size

allowed in this procedure is 5 gigabytes (GB) DELETE FILE Procedure This procedure removes the specified file from the specified directory on Autonomous Database. CREATE\_EXTERNAL\_TABLE Procedure This procedure creates an external table on files in the Cloud. This allows you to run queries on external data from Autonomous Database.

---

## QUESTION 2

### Which types of Oracle Databases are supported?

Data Safe works with the following Oracle Databases

- Oracle on-Premises Databases
- Oracle Cloud Databases
  - Autonomous Database on Shared Exadata Infrastructure
  - Autonomous Database on Dedicated Exadata Infrastructure
  - Exadata DB systems
  - Database Cloud Service on Virtual Machine
  - Database Cloud Service on Bare Metal
  - Oracle Database on Compute

Which data file format is NOT supported when using the package DBMS\_CLOUD on Shared Exadata Infrastructure?

- A. Data Pump Export File
- B. Avro
- C. Parquet
- D. Text
- E. JSON
- F. Microsoft SQL Server (.mdf)

Correct Answer: F

<https://docs.oracle.com/en/cloud/paas/autonomous-database/adbsa/format-options.html#GUID08C44CDA-7C81-481A-BA0A-F7346473B703>

mdf format is for MS SQL server database file

---

## QUESTION 3

Oracle Data Safe is a unified control center for your Oracle databases which helps you understand the sensitivity of your data, evaluate risks to data, mask sensitive data, implement and monitor security controls, assess user security, monitor user activity, and address data security compliance requirements.

Which statement is FALSE?

- A. Oracle Data Safe only supports Autonomous Databases.
- B. Oracle Data Safe helps you assess the security of your cloud database configurations by analyzing database

configurations.

C. Oracle Data Safe helps you find sensitive data in your database by inspecting the actual data in your database and its data dictionary.

D. Oracle Data Safe evaluates user types, how users are authenticated, and the password policies assigned to each user.

Correct Answer: A

<https://www.oracle.com/database/technologies/security/data-safe.html> <https://www.oracle.com/a/tech/docs/dbsec/data-safe/faq-security-data-safe.pdf>

Data Safe works with the following Oracle Databases Oracle on-Premises Databases Oracle Cloud Databases Autonomous Database on Shared Exadata Infrastructure Autonomous Database on Dedicated Exadata Infrastructure Exadata DB systems Database Cloud Service on Virtual Machine Database Cloud Service on Bare Metal Oracle Database on Compute

---

#### QUESTION 4

Which four file formats are supported when loading data from Cloud Storage?

A. DOC

B. AVRO

C. JSON

D. DDL

E. Dcsv

F. Parquet

Correct Answer: BCEF

---

#### QUESTION 5

When using Data Pump to migrate your Oracle database to Autonomous Database, which two objects are imported?

A. Data

B. Schemas

C. Tablespaces

D. Reports

Correct Answer: AB
