

# 1Z0-932<sup>Q&As</sup>

Oracle Cloud Infrastructure 2018 Architect Associate

## Pass Oracle 1Z0-932 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.passapply.com/1z0-932.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Oracle  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Which two statements are true about adding secondary VNICs to an existing compute instance? (Choose two.)

- A. The primary and secondary VNIC association must be in the same availability domain
- B. You can assign an Ephemeral Public IP to a secondary VNIC
- C. You can remove the primary VNIC after the secondary VNIC's attachment is complete
- D. The primary and secondary VNIC association can be in different virtual cloud networks (VCNs)

Correct Answer: AB

---

### QUESTION 2

Which DNS resource record type is used to point a host name to an IPv4 address?

- A. ALIAS
- B. A
- C. CNAME
- D. AAAA

Correct Answer: B

Reference: <https://docs.cloud.oracle.com/iaas/Content/DNS/Reference/supporteddnsresource.htm>

---

### QUESTION 3

You are designing a networking infrastructure in multiple Oracle Cloud Infrastructure regions and require connectivity between workloads in each region. You have created a dynamic routing gateway (DRG) and a remote peering connection.

However, your workloads are unable to communicate with each other.

What are two reasons for this? (Choose two.)

- A. The security lists associated with subnets in each virtual cloud network (VCN) do not have the appropriate ingress rules
- B. Identity and Access Management (IAM) policies have not been defined to allow connectivity across the two VCNs in different regions
- C. A local peering gateway needs to be created in each VCN with a default route rule added in the route table forwarding the traffic to the local peering gateway

- D. An Internet gateway needs to be created in each VCN with a default route rule added in the route table forwarding the traffic to the Internet Gateway
- E. The route table associated with subnets in each VCN do not have a route rule defined to forward the traffic to their respective DRGs

Correct Answer: AE

---

#### QUESTION 4

You need to create a high performance shared file system service, and have been advised to use OCI File Storage Service. You have logged into the OCI Console, created a File System in an availability domain, and followed the steps to mount the shared file system on your Oracle Linux virtual Instance. However, you are still unable to access the shared file system from your Linux instance.

What is the likely reason for this?

- A. There are no security list rules for mount target traffic
- B. There is no IGW set up for mount target traffic
- C. There is no IAM policies set up to allow you to access the mount target
- D. There is no route in your VCN's route table for mount target traffic

Correct Answer: C

---

#### QUESTION 5

Which two parameters are required in a back end set's HTTP health check? (Choose two.)

- A. response body
- B. URL path
- C. timeout
- D. port
- E. status code

Correct Answer: AC
