QUESTION 1

Your customer wants to synchronize Item Attribute Group definitions for an item class in Oracle Product Hub Cloud with a merchandising system. The customer decided to use the standard publishing capability in Oracle Product Hub Cloud to publish the attributes definition.

Which standard publication feature would you enable to fulfill this requirement?

- A. attribute groups and attributes publication for a spoke system
- B. catalogs publication for an export option
- C. item classes publication for a spoke system
- D. catalogs publication for a spoke system
- E. items publication for a spoke system

Correct Answer: A

QUESTION 2

During the Design phase of implementing Oracle Product Hub Cloud, you are asked to review the existing processes of Catalog sharing. You decide to add a Category to the Catalog for sharing.

What are the four business benefits of this decision?

- A. The Category hierarchy and any assigned items to the Categories in the shared content can be referenced within the Catalog.
- B. The complete Category hierarchy in the shared content can be referenced within the Catalog if the items are not assigned to Categories.
- C. The referenced content can belong to only one Category if a Category hierarchy exists.
- D. The referenced content can belong to more than one Category.
- E. The Source Catalog content can be shared with multiple Catalogs.
- F. The Catalog contents can be maintained in a single place.

Correct Answer: ADEF

During the creation of the catalog, sharing can be enabled by specifying a single source catalog that will be used for sharing by reference and setting the value of the sharing content to control what content will be shared from the source catalog. The advantage of using sharing by reference is source catalog content can be shared to multiple catalogs and maintained in a single place, the source catalog. In addition, the referenced content can be more than one category, for example a complete category hierarchy and any assigned items to categories in shared content can also be reference within the catalog.

QUESTION 3

Which statement is true about publishing items in Oracle Product Hub Cloud?

- A. All newly created items are published, irrespective of the Publication Criteria.
- B. All items that meet the last Publication Date or Criteria Date, irrespective of the Publication Criteria, are published.
- C. All items that meet the last Publication Date or Criteria Date and the Publication Criteria are published.
- D. All items that meet the Publication Criteria, irrespective of the last Publication Date or Criteria Date, are published.

Correct Answer: B

QUESTION 4

An implementation Consultant has been assigned the following tasks in an Oracle Functional Setup Manager Implementation Project:

Manage Lifecycle Phases

Manage Item Classes

Manage Default Item Class

Which four setups can the Consultant perform by using these tasks?

- A. creating and editing item lifecycle phases
- B. adding a default change order type
- C. deploying extensible flexfields
- D. creating item extensible flexfields
- E. specifying data quality attributes to create functional pages
- F. creating item class templates

Correct Answer: BCDE

QUESTION 5

Your organization has a need to use multiple catalogs and share categories across catalogs. Which four options apply to Catalog sharing?

- A. Changing the catalog security from public to private might impact the catalogs that are sharing the category by reference.

- B. Public catalog categories can be shared across multiple catalogs.
- C. Source categories by copying from multiple catalogs.
- D. Public catalog categories cannot be shared across multiple catalogs.
- E. Multiple catalogs can share the same category by reference sharing.
- F. Items cannot be assigned to multiple shared catalogs.

Correct Answer: BEF
