-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Which option correctly describes the high-level process from loading measurements through calculating usage?

A. 1. Load Initial Measurements

2.

Validate, edit, and estimate Initial Measurements

3.

Create Final Measurements

4.

Update Initial Measurements

B. 1. Load Initial Measurements

2.

Verify, evaluate, and enter Initial Measurements

3.

Create Final Measurements

4.

Calculate Usage

C. 1. Load Initial Measurements

2.

Validate, evaluate, and estimate Initial Measurements

3.

Update Initial Measurements

4.

Calculate Usage

D. 1. Load Initial Measurements

2.

Validate, edit, and estimate Initial Measurements

3.

Create Final Measurements

4.

Calculate Usage

Correct Answer: B

QUESTION 2

Your customer's initial measurement data (IMD) has been imported and can be viewed through the Measuring Component portal, but is not in the "Final" measurement status.

What can you assume that the IMD has passed?

- A. Critical Validation
- B. Multiplier Check Validation
- C. Sum Check Validation
- D. Critical Validation, High/Low Check Validation, and Sum Check Validation
- E. High/Low Check Validation

Correct Answer: B

QUESTION 3

Which four statements correctly describe what a Service Agreement Type controls? (Choose four.)

- A. It controls the Late Payment Charge Calculation Method.
- B. It controls the Service Type to be billed.
- C. It controls the valid Rates that can be applied to the service agreement type.
- D. It controls debt age.
- E. It controls where the bill is to be sent.

Correct Answer: ABCD

QUESTION 4

Your client has the following requirements:

Many customers are installing their own solar electrical generation equipment. When these customers generate more electricity than required for their own use, the surplus can be exported back to the power grid.

In order to measure this generation, we have installed special scalar devices. These devices have separate registers to measure the energy generated (export) and the energy received (import) from the National Grid. Both reads will be stored in kWh, but the import is subtractive and export is consumptive.

What solution should you choose to configure the measuring component types for these specific requirements?

- A. Create two service points: one for subtractive import and the other for consumptive export.
- B. Create one new measuring component type for creating two measuring components (one for import and the other for export) that will be linked to one scalar device.
- C. Create one new measuring component type for creating a new measuring component that will be linked to two different scalar devices (one for import and the other for export).
- D. Create two new measuring component types (one for subtractive import and the other for consumptive export) to enable the creation of two measuring components that will be linked to one scalar device.

Correct Answer: D

QUESTION 5

How many bill segment-related financial transactions do pay plans have?

- A. depends on the number of payments that is part of the pay plan
- B. one
- C. depends on the number of bills that will contain the customer's pay plan commitments
- D. none
- E. unlimited

Correct Answer: C
