### QUESTION 1

Which configuration steps are required to derive loss-adjusted kWh on a measuring component based on a loss factor value related to a service point?

- A. Configure a Service Point Characteristic Type and derivation algorithm, and then associate the algorithm to the Measuring Component Type and the characteristic value to the service point.
- B. Configure an SQL and the derivation algorithm, and then associate the algorithm to the Measuring Component Type and SQL to the service point.
- C. Configure a factor and derivation algorithm, and then associate the factor to the Measuring Component Type and the derivation algorithm to the service point.
- D. Configure a factor and derivation algorithm, and then associate both to the Measuring Component Type and service point.
- E. Configure a Service Point Characteristic Type, factor, derivation algorithm, and Service Quantity Identifier (SQL), and then associate the SQL and derivation algorithm to the Measuring Component Type and the characteristic value to the service point.
