QUESTION 1

Refer to the exhibit.

```
ACL 10
Statements are written in this order:
A. permit any
B. deny 172.21.1.128 0.0.0.15
C. permit 172.21.1.129 0.0.0.3
D. permit 172.21.1.142 0.0.0.3
```

Statements A, B, C, and D of ACL 10 have been entered in the shown order and applied to interface E0 inbound, to prevent all hosts (except those whose addresses are the first and last IP of subnet 172.21.1.128/28) from accessing the network. But as is, the ACL does not restrict anyone from the network. How can the ACL statements be re-arranged so that the system works as intended?

- A. ACDB
- B. BADC
- C. DBAC
- D. CDBA

Correct Answer: D

Routers go line by line through an access list until a match is found and then will not look any further, even if a more specific or better match is found later on in the access list. So, it is best to begin with the most specific entries first, in this case the two hosts in line C and D. Then, include the subnet (B) and then finally the rest of the traffic (A).

QUESTION 2

Drag and drop the CSMA components from the left onto the correct descriptions on the right.

Select and Place:

1-persistent	access mode used for Ethernet networks
CSMA/CA	access mode used for Wi-Fi networks
CSMA/CD	access mode used in the controller area network
0-persistent	rules that define the system response when a collision occurs on an Ethernet network
P-persistent	rules that define the system response when a collision occurs on a Wi-Fi network

Correct Answer:

	1-persistent
	P-persistent
	O-persistent
	CSMA/CD
	CSMA/CA

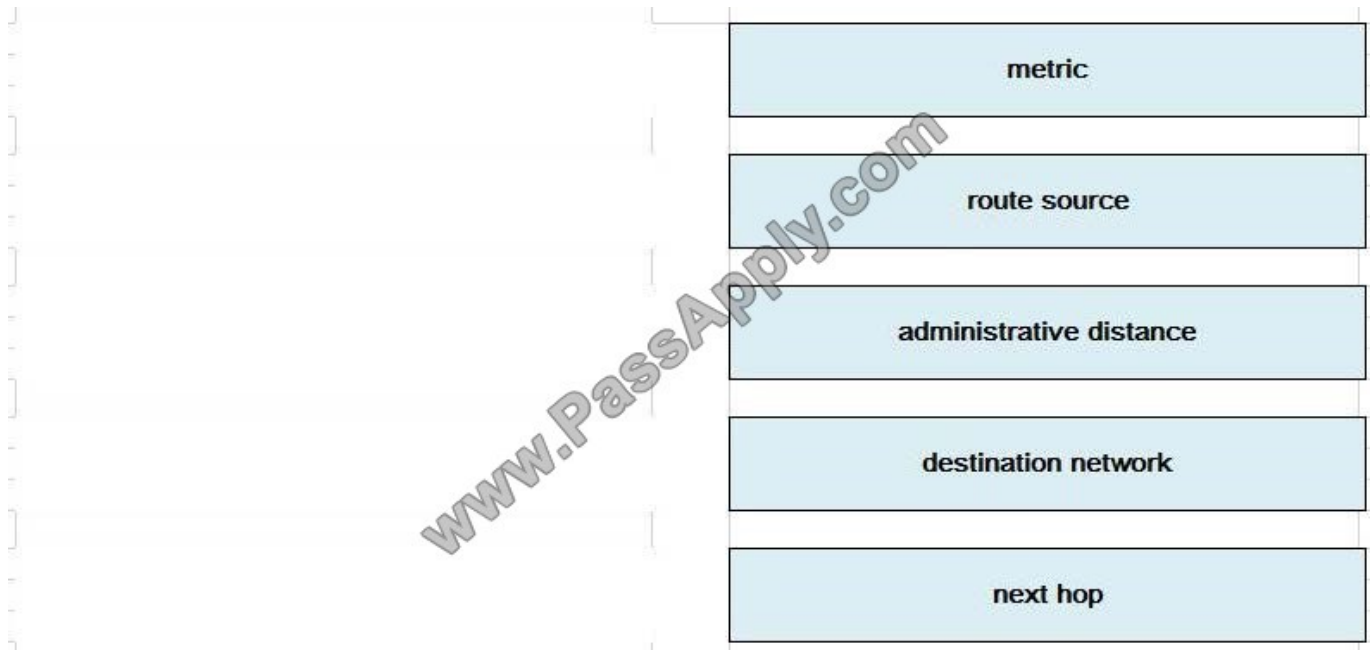

QUESTION 3

Drag and drop the values in a routing table from the left onto the correct meanings on the right.

Select and Place:

administrative distance	code that indicates the method by which the router learned the route
destination network	value used by the route to determine the preferred route
metric	indicator of the trustworthiness of the route
next hop	network to which the router forwards packets on the associated route
route source	remote network address

Correct Answer:

QUESTION 4

Standard industrialized protocol of etherchannel?

- A. LACP
- B. PAGP
- C. PRP
- D. REP

Correct Answer: A

QUESTION 5

Which LLDP extension provides additional support for VoIP?

- A. TLV
- B. LLDP-MED
- C. LLDPv3
- D. LLDP-VOIP

Correct Answer: B
