QUESTION 1

The network administrator has used VLANs to separate VoIP frames from data frames in the wired network. What must the administrator use to separate those frames in the wireless network?

A. multiple SSIDs

B. multiple authentications

C. multiple WEP or WPA keys

D. multiple channels

E. multiple 802.11 radios (a, b, g, n)

Correct Answer: A

Multiple IEEE 802.11 service set identifiers (SSIDs) allow you to create different levels of network access and to access virtual LANs (VLANs). You can configure up to 16 separate SSIDs to support up to 16 VLANs. Each VLAN can have a different wireless security configuration so that the devices that support the latest Cisco security enhancements can exist alongside legacy devices. This additional access point functionality enables a variety of users having different security levels to access different parts of the network. http://www.cisco.com/en/US/docs/wireless/access_point/350/con figuration/guide/ap350ch1_ps458_TSD_Products_Configuration_Guide_Chapter.html

QUESTION 2

About SPLIT MAC design. Drag each description on the left to the appropriate term on the right.

Select and Place:

WLC

| Transmit Beacons |
| Client Authentication |
| Encryption/Decryption |

| RF Management | AP |

| Transmission and Buffering of Frames |

| 802.11 Association and Re-Association |

Correct Answer:

QUESTION 3

What three components must be the same on a controller and the RADIUS server when adding a RADIUS server to a WLC? (Choose three.)

A. Username

B. Shared Secret

C. Index Priority

D. Port Number

E. IP Address

F. Network Mask

Correct Answer: BDE

QUESTION 4

Refer to the exhibit.

Which menu gives you access to manage background tasks in Cisco WCS?

A. None, because the General tab provides access to the management of background tasks

B. Monitor

C. Configure

D. Services

E. Administration

F. Tools

Correct Answer: E

The Administration menu enables you to schedule tasks like making a backup, checking a device status, auditing your network, synchronizing the MSE, and so on. It also contains Logging to enable various logging modules and specify restart requirements. For user administration such as changing passwords, establishing groups, setting application security settings, and so on, choose AAA. From the Administration Menu, you can also access the licensing information, set user preferences, and establish high availability (a secondary backup device running WCS).

QUESTION 5

The existing Cisco Unified Wireless Controller is running version 7.0 code for both the controllers and the Cisco WCS. A controller has been configured with an appropriate rogue rule condition to report discovered APs to the Cisco WCS. Which default alarm level is used to display all rogue APs in the Alarm Summary?

A. Critical

B. Flash

C. Urgent

D. Major

E. Minor

Correct Answer: E

Yellow-Minor alarm is used to display all rogue Aps in alarm summary.
