QUESTION 3

Which advantage does the agile process offer compared to waterfall software development?

A. to add or update features with incremental delivery

B. to view the full scope of end-to-end work

C. to have each phase end before the next begins

D. to fix any issues at the end of the development cycle

Correct Answer: A

Agile uses smaller time increments or "sprints," that encompass the full process of analysis, design, code, and test but on a much smaller aspect of an application. The goal is to finish a feature or capability for each sprint, resulting in a potentially shippable incremental piece of software.
