QUESTION 1

What are three primary site survey considerations? (Choose three.)

- A. Site information
- B. Technical resources
- C. Customer power requirements
- D. Data center physical audit
- E. Disaster recovery plan

Correct Answer: ACD

QUESTION 2

A Vblock System 720 has been configured in the factory according to the VCE Logical Build Guide. Which statement is correct?

- A. Each service-profile should have at least one vNIC pinned to fabric interconnect A; one vNIC pinned to fabric interconnect B, and failover enabled.
- B. Each service-profile should have at least one vNIC pinned to fabric interconnect A; one vNIC pinned to fabric interconnect B, and failover disabled.
- C. Each service-profile should have at least one vHBA pinned to fabric interconnect A; one vHBA pinned to fabric interconnect B, and failover enabled.
- D. Each service-profile should have at least one vHBA pinned to fabric interconnect A; one vHBA pinned to fabric interconnect B, and failover disabled.

Correct Answer: B

QUESTION 3

Which Cisco Nexus 5000 Series switch feature provides traffic prioritization and egress bandwidth allocation for a Vblock System 320 deployment?

- A. Quality of Service (QoS)
- B. Data Center Ethernet (DCE)
- C. jumbo maximum transmission units (MTU)
- D. priority flow control

Correct Answer: A

QUESTION 4

What are three purposes of the master host in a vSphere high availability (HA) cluster? (Choose three.)

- A. to monitor the state of slave hosts
- B. to monitor the power state of all protected virtual machines
- C. to manage the lists of cluster hosts
- D. to migrate virtual machines when a vMotion is requested
- E. to install the HA agent on newly added hosts

Correct Answer: ABC

QUESTION 5

In a Vblock System 320, which type of port channel is configured from the Cisco Nexus 5548 switch to the fabric interconnects?

- A. static port channel
- B. virtual port channel (vPC)
- C. enhanced virtual port channel
- D. virtual port channel plus (vPC+)

Correct Answer: B
