## QUESTION 1

Click the Exhibit button.

Referring to the exhibit, which two actions would allow powering on the virtual machine? (Choose two.)

- A. Increase the memory reservation on the virtual machine.
- B. Decrease the memory reservation on the virtual machine.
- C. Add more memory to the ESXi host.
- D. Increase the amount of memory allocated to the virtual machine.

Correct Answer: BC

## QUESTION 2

In a Vblock 320 Unified Networking environment, a UCS service profile is unable to locate its boot device. Which two statements are valid troubleshooting steps? (Choose two.)

- A. Verify that the targets in the SAN boot policy match the zoning and the masking on the array.
- B. Verify that the vHBAs are logging into the SAN fabrics by examining the Fabric Login (FLOGI) database on the Cisco

MDS switches.

C. Verify that PowerPathVE can see all paths to the device.

D. Verify that the vHBAs are logging into the SAN fabrics by examining the Fabric Login (FLOGI) database on the Cisco Nexus 5000 series switches.

Correct Answer: AD

---

### QUESTION 3

During an upgrade engagement of a Vblock System, the customer realizes that they no longer have the credentials for the service account that are being used for the vCenter services. Due to time constraints, they recommend using the user credentials of the system administrator until the customer security team can be engaged to reset the service account password. After the upgrade completes, the vCenter services will not start. Which log file in the C:\ProgramData\VMware\VMware VirtualCenter\Logs directory contains information relevant to troubleshooting the problem?

A. tomcatlogscatalina.date

B. vpxd.log

C. drmdump

D. vpxuser.log

Correct Answer: B

---

### QUESTION 4

Migrating a host to the Nexus 1000V requires what information? (Choose two.)

A. source port group

B. VSM IP address

C. vNIC failover policy

D. DVUplink port group

Correct Answer: AD

---

### QUESTION 5

In which two situations does a USB device reconnect to a VM automatically with USB auto connect enabled? (Choose two.)

A. The USB device is unplugged from the host then plugged back into the same USB port.

B. The USB device is unplugged from the host then plugged into a different USB port.

C. The device is mutating identity during usage.

D. The virtual machine is powered off.

Correct Answer: AC
