QUESTION 1

A customer calls complaining that their CDDVD drive is no longer accessible on their virtual server. After investigating, you notice their virtual server is configured for VMware Fault Tolerance enabled. Which condition would cause this situation to occur?

- A. The secondary node has Connect at power on disabled.
- B. The secondary node has Use a physical drive selected.
- C. The source ISO is not on shared storage.
- D. The auto detect option is not selected.

Correct Answer: C

QUESTION 2

A vApp has been deployed with the wrong IP address information and must be updated. You have logged into the virtual machine, and updated the static IP address from the console, validating connectivity. After a system reboot, users are no longer able to connect to the system.

What is the problem?

- A. The IP configuration should take place in the vApp container.
- B. vApps require DHCP assigned addresses instead of static.
- C. The segment ID was incorrectly configured for the VXLAN.
- D. The IP configuration should take place in the vSwitch layer.

Correct Answer: A

QUESTION 3

According to the VCE Logical Build guide, which command would you use to install the Cisco FNIC driver using the vSphere CLI in ESXi 5.0?

- A. vihostupdate.pl
- B. vicfg-vmknic
- C. vicfg-nics
- D. esxstop

Correct Answer: A

**QUESTION 4**

You are on deployment, and must enable the SSH service on an ESXi host. In the vSphere client GUI under Configurator, which submenu do you use to complete this task?

- A. security profile
- B. authentication services
- C. advanced settings
- D. system resource allocation

Correct Answer: A

QUESTION 5

Which vCenter feature is used by vCenter Update Manager (VUM) when patching ESXi servers?

- A. vSphere DRS
- B. Fault Tolerance
- C. Storage vMotion
- D. vSphere HA

Correct Answer: A
