QUESTION 1

A VM on the Vblock System 320 is unable to communicate on the customer network. When examining the virtual machine, you notice it has the same port group as the other VMs on the same ESXi server. Which action must you perform to resolve the problem?

- A. You must reboot the VM.
- B. You must restart the network agents on the ESX server.
- C. You must verify that the VM's network adapter is connected.
- D. You must install the Nexus 1000V agent on the virtual machine.

Correct Answer: C

QUESTION 2

You are implementing 32 new UCS B230 M3 blades into an existing Vblock System with 16 blades. After powering the new blades on, and migrating them to the Cisco Nexus 1000V, you notice that half of the new blades no longer respond to any network traffic.

What is the cause?

- A. There is insufficient vSphere licensing to license the new hosts.
- B. There is insufficient Cisco licensing to license the new hosts.
- C. The network drivers need to be updated.
- D. The Cisco Nexus 1000V is limited to 32 hosts.

Correct Answer: B

QUESTION 3

You are adding an NFS volume to an ESXi host. Which three steps are required? (Choose three.)

- A. Create a vmkernel interface on the ESXi host.
- B. Create a network label to identify the connection.
- C. Choose the NFS folder name in the format volmountsdatastore1.
- D. Choose Network File System as the storage type.
- E. Assign a VSAN to the vmkernel interface.

Correct Answer: ACD

QUESTION 4

Which three statements are correct about vApps? (Choose three.)

- A. vCenter is required.
- B. vApps contain virtual machines.
- C. vApps define resource settings.
- D. vApps specify virtual machine failover.
- E. vApps include virtual vSwitch configurations.

Correct Answer: ABC

QUESTION 5

While reviewing the vBlock System 320 configuration, you verify the physical NIC mode is configured for failover for a teamed vSwitch.

Which mode would be used to configure the NICs?

- A. active
- B. passive
- C. promiscuous
- D. unused

Correct Answer: A
