**QUESTION 1****CORRECT TEXT**

Ann, a CEO, has purchased a new consumer-class tablet for personal use, but she is unable to connect it to the company's wireless network. All the corporate laptops are connecting without issue. She has asked you to assist with getting the

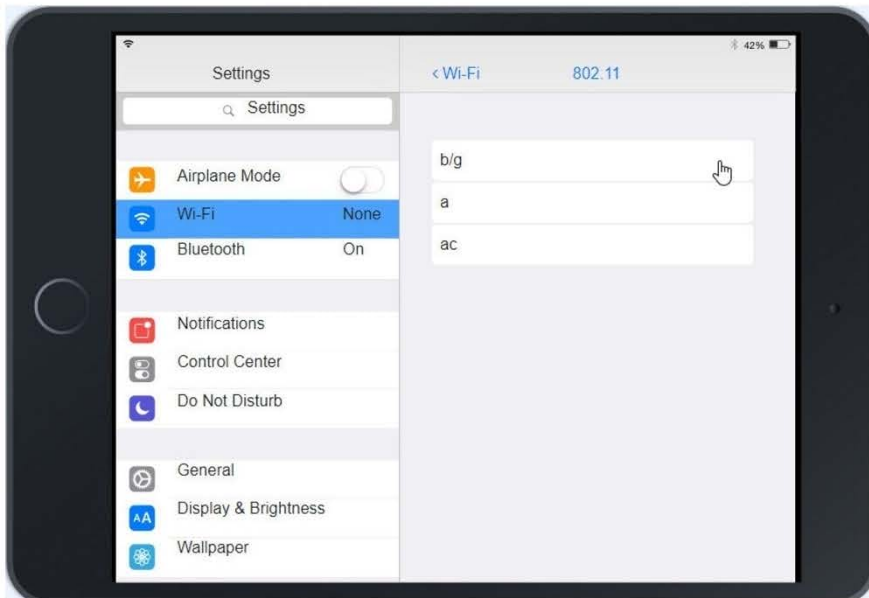

device online.

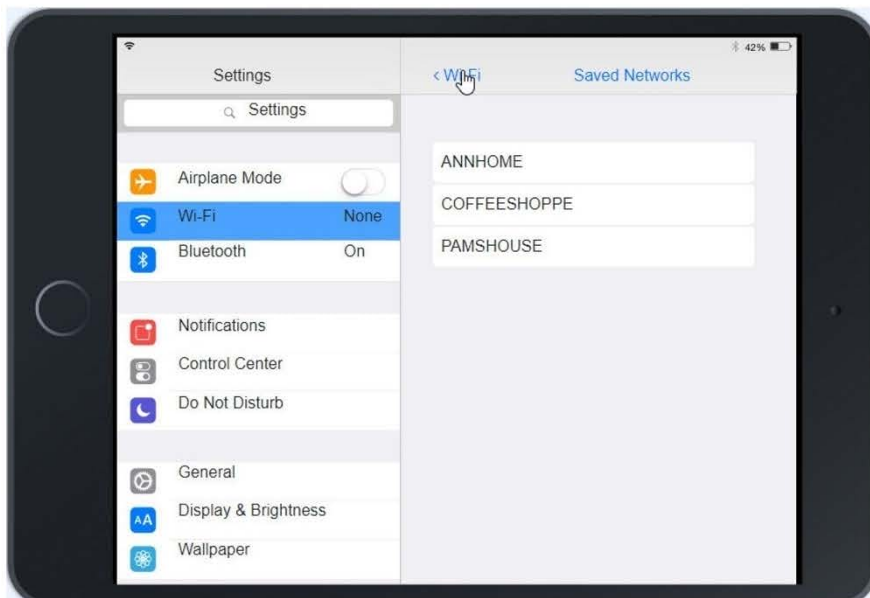

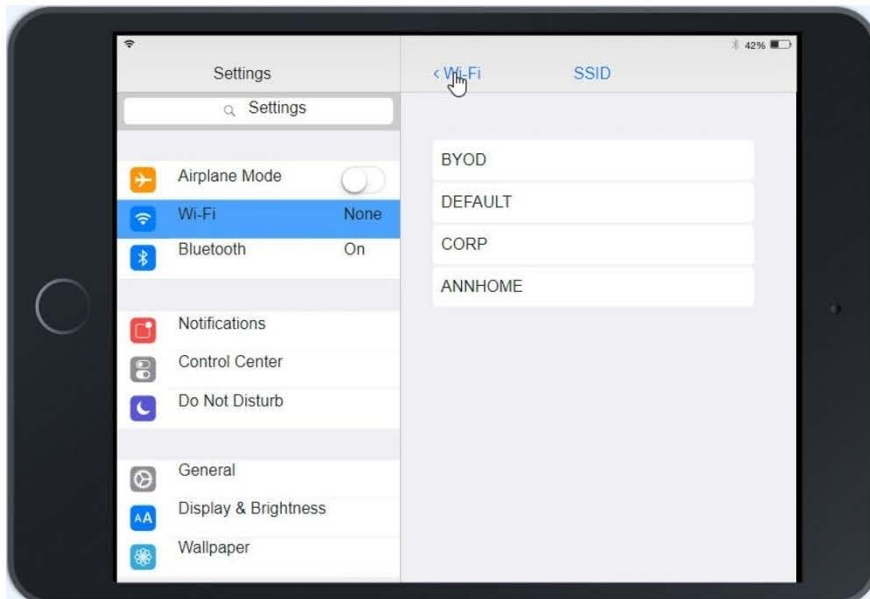

INSTRUCTIONS

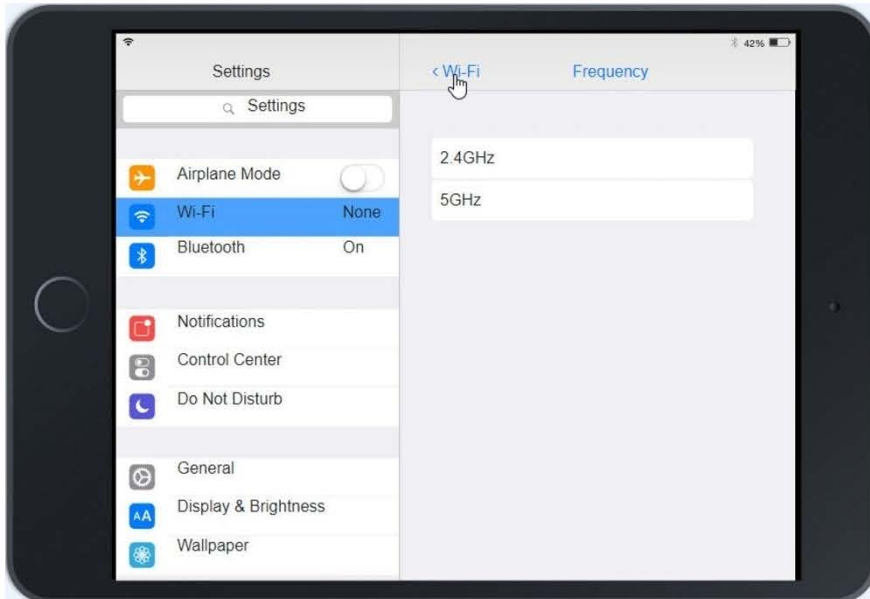

Review the network diagrams and device configurations to determine the cause of the problem and resolve any discovered issues.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

QUESTION 2

A company discovered that numerous computers from multiple geographic locations are sending a very high number of connection requests which is causing the company's web server to become unavailable to the general public. Which of the following attacks is occurring?

- A. Zero day
- B. SQL injection
- C. Cross-site scripting
- D. Distributed denial of service

Correct Answer: D

The company is experiencing a distributed denial of service (DDoS) attack. A DDoS attack is a type of cyber attack in which multiple compromised systems are used to target a single system, causing a denial of service for users of the targeted system.

QUESTION 3

A company's assets are scanned annually. Which of the following will most likely help the company gain a holistic view of asset cost?

- A. Creating a database
- B. Assigning users to assets
- C. Inventorying asset tags
- D. Updating the procurement account owners

Correct Answer: A

QUESTION 4

A technician suspects a rootkit has been installed and needs to be removed. Which of the following would BEST resolve the issue?

- A. Application updates
- B. Anti-malware software
- C. OS reinstallation
- D. File restore

Correct Answer: C

If a rootkit has caused a deep infection, then the only way to remove the rootkit is to reinstall the operating system. This is because rootkits are designed to be difficult to detect and remove, and they can hide in the operating system's kernel, making it difficult to remove them without reinstalling the operating system <https://www.minitool.com/backup-tips/how-to-get-rid-of-rootkit-windows-10.html>

QUESTION 5

A client wants a technician to set up a proxy server in a branch office to manage internet access. This involves configuring the workstations to use the new proxy server. Which of the following Internet Options tabs in Control Panel would be most appropriate for the technician to use to configure the settings?

- A. Privacy
- B. Advanced
- C. Content
- D. Connections
- E. Security

Correct Answer: D

The Connections tab in Internet Options allows the technician to configure the proxy server settings for the workstations. The technician can enter the proxy server address and port number, and specify which websites to bypass the proxy server for. The other tabs are not relevant for configuring the proxy server settings.
