Correct Answer: A

Reference: <http://www.computerhope.com/chkdskh.htm>

QUESTION 2

Which of the following areas of a file system should a standard user have restricted permissions to in order to promote a security best practice? (Select TWO).

- A. Temporary Internet Files
- B. My Document Files
- C. Windows System Files
- D. Network Files
- E. Program Files

Correct Answer: CE

Windows program files are important for Windows operating system. If these files are deleted, Windows will corrupt. Similarly program files are related to applications and programs installed on a computer. These are highly sensitive files because they are related to the functioning of the operating system and the applications installed on it.
