QUESTION 1

A user is configuring the email settings on a smartphone. Which of the following configurations will allow the user to synchronize email from multiple devices?

- A. IMAP
- B. S/MIME
- C. POP3
- D. SMTP

Correct Answer: A

QUESTION 2

When securing a small office home office (SOHO) that has empty cubicles with unused network ports, which of the following can be used to secure ONLY the unused ports?

- A. Use DHCP addressing on the network.
- B. Disable the ports on the router or switch.
- C. Power down the router when it is not being used.
- D. Disable DNS on the network.

Correct Answer: B

To secure unused ports, just disable them on the router or the switch.

QUESTION 3

A company has decided that all remote users need to use two-factor authentication to increase security.

Several remote users have reported losing the RSA token and have replaced it several times.

Which of the following is the solution for these users?

- A. Use biometrics instead of the RSA token.
- B. Remove the RSA token requirement for any user that has lost an RSA token.
- C. Give the users with lost RSA tokens RFID badges instead.
- D. Attach the RSA token to the lid of the laptop.

Correct Answer: A

QUESTION 4

A technician is configuring a PC that will have confidential information stored on it. To ensure that only authorized users can access this PC, which of the following should the technician do? (Select TWO).

- A. Disable the guest account
- B. Install antivirus applications
- C. Disable DHCP
- D. Change the SSID
- E. Change the default username

Correct Answer: AE

To prevent unauthorized access to the PC, disable guest accounts and change default usernames for maximum security.

QUESTION 5

Which of the following utilities will display a listing of active IP ports on the computer being tested?

- A. NETSTAT
- B. PING
- C. IPCONFIG
- D. TRACERT

Correct Answer: A
