QUESTION 1

An administrator needs to use the Agent for VMware and Hyper-V to protect several virtual machines in a vSphere environment. The administrator needs to capture image-level, full and incremental backups of the VMware virtual machines according to a custom schedule.

Which additional requirement must be met before configuring backup definitions for the virtual machines?

A. confirm the Agent for Windows has been installed on all virtual machines

B. ensure all virtual machines are powered off and accessible from the Backup Exec server

C. ensure all virtual machines are powered on and accessible from the Backup Exec server

D. ensure the VMware virtual machines are hardware version 7 or later

Correct Answer: D

QUESTION 2

An administrator needs to restore a folder to a running Hyper-V virtual machine. What must be installed for this to be successful?

A. Agent for Applications and Databases on the virtual machine

B. Agent for Windows on the Hyper-V host server

C. Agent for VMware and Hyper-V on the Hyper-V Host

D. Agent for Windows on the virtual machine

Correct Answer: D

QUESTION 3

Which two data types are backed up and restored through Shadow Copy Components? (Select two.)
