QUESTION 1

A Deployment Solution administrator is creating a job to capture an image of a computer\\'s hard drive using a Disk Image task. What should precede the Disk Image task?

A. a task to run Sysprep

B. a task to defrag the disk

C. a task to run PC Transplant

D. a task to capture the computer\\'s OS license key

Correct Answer: A

QUESTION 2

A system administrator has set up a custom security role to allow some desktop administrators a particular combination of software management and software update abilities. When the desktop administrators use the console, they have right-click options for performing desired operations, but when using these operations they get failure messages indicating that they have insufficient access. Which modification needs to be performed on the desktop administrators\\' security role to allow sufficient access?

A. Additional privileges need to be added to therole.

B. Additional permissions need to be added to therole.

C. They have to be made members of the local Administrators group on the server.

D. They have to be made members of the local Administrators group on the desktops.

Correct Answer: B

QUESTION 3

Which statement is true about the Application Metering feature of Inventory Solution?

A. It tracks and compares changes to application files and registry keys.

B. It monitors and denies the usage of applications on the network.

C. It gathers detailed information about application files.

D. It limits the usage of applications to purchased licenses.

Correct Answer: C

QUESTION 4

Based on a corporate policy, every 12 months one-third of the organization\\\'s computers are replaced with new systems. This results in very large purchase orders being placed all at the same time. Their current replacement processes cause significant productivity losses for the users during the replacement period. What can Deployment Solution do to help reduce their productivity losses?

A. It can simplify the deployment process by bundling all steps for new system builds into a single automated policy including operating systemdeployment, software provisioning, and user configuration.

B. It can allow for automatic creation of new computer records from an imported lists of computer information from the manufacturers, whichsimplifies the imaging process.

C. It can simplify the process of computer deployments to departments by coordinating with an Active Directory connector for automatedconfiguration setting tasks.

D. It can add an interface in the console to simplify and synchronize deployment schedules by allowing department heads to enter personalmaintenance plans.

Correct Answer: B

QUESTION 5
