### QUESTION 1

A system administrator sets up a Software Inventory policy to run every Monday between

08:00

and 10:00. After the policy has taken effect, users report that their computers are running slowly during the inventory scans. Which setting will reduce the effect of the inventory scan on users' computers?

A.

Modify the Send Inventory Change (Deltas) Only option.

B.

Modify the System Resource Usage option.

C.

Modify the Throttle Inventory Reporting option.

D.

Modify the policy to run between 08:00 and 14:00.

Correct Answer: B

---

### QUESTION 2

Microsoft released several critical and important updates and a system administrator needs to determine which updates are applicable to the existing environment. Where can the administrator access additional information about applicable software updates?

A. Microsoft Vulnerability Analysis

B. Patch Remediation Center

C. Software Updates Catalog

D. Software Update Management Center

Correct Answer: B

---

### QUESTION 3

Microsoft Office has been successfully pushed out as a Quick Delivery task to a group of systems. When the administrator checks the report of software currently installed on the systems, the newly delivered software is missing. Why is the installed software missing from the report?

A. The detection rule for Office was configured with an incorrect MSI code.

- B. The most recent Software Inventory scan was run before the delivery was completed.
- C. SQL Server timed out during the building of the report, causing incomplete report results.
- D. The Software Management Solution Agent needs to be installed on the targeted computers.

Correct Answer: B

---

#### QUESTION 4
