QUESTION 1

A customer is implementing pcAnywhere and has very strict security guidelines. How can a system administrator help ensure that pcAnywhere is secure and still use all of its features?

- A. select View Only mode
- B. use PID/PPS
- C. block the unsecure ports
- D. use encryption

Correct Answer: D

QUESTION 2

An administrator created a software resource with a detection rule. What should be used to determine whether this software resides on a managed computer?

- A. Two Pass Inventory policy
- B. Delta File Inventory task
- C. Detailed File Inventory task
- D. Targeted Software Inventory policy

Correct Answer: D

QUESTION 3

What are two possible Patch Management Solution 7.1 configuration changes that can be made to reduce the total number of bulletins managed in the solution? (Select two.)

- A. Deselect additional languages that are undesired in the Managed Languages section of the Patch Management core settings.
- B. Edit the PMImport.xml and delete rows that contain unused language and product names found in the file.
- C. Select Microsoft product names from the Resource Inclusions section of the Microsoft settings.
- D. Select unused Microsoft product names in the environment in the Resource Exclusions section of the Microsoft settings.
- E. Select the Disable All Superseded Software Updates setting within the Import Data for Microsoft policy.

Correct Answer: AD

QUESTION 4

Which file type is used in PC Transplant to describe all of the components that are needed to transfer an application's settings and data files?

- A. PBT file
- B. PCT file
- C. Gho file
- D. A2i file

Correct Answer: D

QUESTION 5

A school with a limited budget either receives computers as donations or buys them in small quantities. As a result, the school has several varieties of computers and associated hardware. Each quarter, all student computers must be reset to a fresh state to prepare for the next group of students. When the computers are reset, the OS is manually installed, all of the drivers for each unique system are installed, and each application is installed one at a time by CD. The process is cost effective, but highly prone to error and often results in several days of clean-up by the teachers. Which two benefits would the school realize by using Deployment Solution? (Select two.)

- A. It can automate the application installations through use of the Software Portal.
- B. It can install the operating systems automatically using a Scripted OS Installation.
- C. It can manage the drivers for each system through use of Prepare the Image tasks.
- D. It can install the operating system automatically through use of PC Transplant.
- E. It can automate the application installations through use of Restore Software tasks.
- F. It can automate driver installation through use of Deploy Anywhere.

Correct Answer: BF
