QUESTION 1

A Case Team is managing a project with tight deadlines. Several attorneys are waiting to perform a search and review of documents. The Case Team believes some image-based documents in the population require OCR in order to be made searchable. Which workflow in Symantec Clearwell eDiscovery Platform 7.x should the Case Team follow to run OCR on this data population?

A. Enable OCR processing on the processing settings page, thereby increasing efficiency by applying OCR in one step.

B. Ensure OCR processing is disabled on the processing settings page. Once initial processing is complete, run a search to identify items that need OCR and run a secondary OCR processing job on those items.

C. Enable OCR processing on the processing settings page, but be sure to exclude images that are being imported via Load File Import. These items may already have associated text files.

D. Enable OCR processing on the processing settings page for all documents except pdf documents, which take longer to identify and OCR.

Correct Answer: B
