QUESTION 1

Employees of an accounting company often take their notebooks to customer sites. The administrator needs to apply a different firewall policy when the notebooks are disconnected from the accounting company's network. What must the administrator configure to use the two different policies?

- A. Groups
- B. Domains
- C. Sites
- D. Locations

Correct Answer: B

QUESTION 2

A company receives a high number of reports from users that files being downloaded from internal web servers are blocked. The Symantec Endpoint Protection administrator verifies that the Automatically trust any file downloaded from an intranet website option is enabled.

Which configuration can cause Insight to block the files being downloaded from the internal web servers?

- A. Intrusion Prevention is disabled.
- B. Local intranet zone is configured incorrectly on the Windows clients browser settings.
- C. Local intranet zone is configured incorrectly on the Mac clients browser settings.
- D. Virus and Spyware Definitions are out of date.

Correct Answer: B

QUESTION 3

Which is an example of legitimate software that Intrusion Protection Systems (IPS) may detect as a threat?

- A. Running a P2P software on a network
- B. Running a FTP client on a network
- C. Running a key logger on a network
- D. Running a vulnerability scanner on a network

Correct Answer: A

QUESTION 4

Which Symantec Endpoint Protection Management (SEPM) database option is the default for deployments of fewer than 1,000 clients?

- A. Embedded. Using the Sybase SQL Anywhere database that comes with the product
- B. On SEPM: Installing Microsoft SQL on the same server as the SEPM
- C. External to SEPM: Using a preexisting Microsoft SQL server in the environment
- D. Embedded. Using the Microsoft SQL database that comes with the product

Correct Answer: A

QUESTION 5

An organization created a rule in the Application and Device Control policy to block peer-to-peer applications. What two other protection technologies can block and log such unauthorized application? (Choose two.)

- A. Memory Exploit Mitigation
- B. Virus and Spyware Protection
- C. Custom IPS Signatures
- D. Host Integrity
- E. Firewall

Correct Answer: CE
