### QUESTION 1

Administrators at a company share a single terminal for configuring Symantec Endpoint Protection. The administrators want to ensure that each administrator using the console is forced to authenticate using their individual credentials. They are concerned that administrators may forget to log off the terminal, which would easily allow others to gain access to the Symantec Endpoint Protection Manager (SEPM) console.

Which setting should the administrator disable to minimize the risk of non-authorized users logging into the SEPM console?

- A. allow users to save credentials when logging on
- B. delete clients that have not connected for specified time
- C. lock account after the specified number of unsuccessful logon attempts
- D. allow administrators to reset the passwords

Correct Answer: A

---

### QUESTION 2

What type of exceptions could an administrator create from the Symantec Endpoint Protection Manager for a Linux client? (Choose two.)

- A. Trusted Web Domain
- B. Security Risk Exceptions - File
- C. Security Risk Exceptions - Extension
- D. Known Risks
- E. Security Risk Exceptions - Folder

Correct Answer: CE

---

### QUESTION 3

Which two instances could cause Symantec Endpoint Protection to be unable to remediate a file? (Select two.)

- A. Another scan is in progress.
- B. The detected file is in use.
- C. There are insufficient file permissions.
- D. The file is marked for deletion by Windows on reboot.

E. The file has good reputation.

Correct Answer: BC

---

#### QUESTION 4

The LiveUpdate Download Schedule is set to the default on the Symantec Endpoint Protection Manager (SEPM).

How many content revisions must the SEPM keep to ensure clients that check in to the SEPM every 10 days receive xdelta content packages instead of full content packages?

- A. 10
- B. 20
- C. 30
- D. 60

Correct Answer: C

#### QUESTION 5

An administrator needs to increase the access speed for client files that are stored on a file server. Which configuration should the administrator review to address the read speed from the server?

- A. Enable Network Cache in the client's Virus and Spyware Protection policy
- B. Add the applicable server to a trusted host group
- C. Create a Firewall allow rule for the server's IP address
- D. Enable download randomization in the client group's communication settings

Correct Answer: A
