### QUESTION 1

Why is it important for an administrator to utilize the grid scan feature?

- A. To distribute the scan workload across multiple network discover servers
- B. To distribute the scan workload across the cloud servers
- C. To distribute the scan workload across multiple endpoint servers
- D. To distribute the scan workload across multiple detection servers

Correct Answer: D

If you plan to use the grid scanning feature to distribute the scanning workload across multiple detection servers, retain the default value (1)

---

### QUESTION 2

A DLP administrator has enabled and successfully tested custom attribute lookups for incident data based on the Active Directory LDAP plugin. The Chief Information Security Officer (CISO) has attempted to generate a User Risk Summary report, but the report is empty. The DLP administrator confirms the Cisco's role has the "User Reporting" privilege enabled, but User Risk reporting is still not working.

What is the probable reason that the User Risk Summary report is blank?

- A. Only DLP administrators are permitted to access and view data for high risk users.
- B. The Enforce server has insufficient permissions for importing user attributes.
- C. User attribute data must be configured separately from incident data attributes.
- D. User attributes have been incorrectly mapped to Active Directory accounts.

Correct Answer: D

---

### QUESTION 3

What detection technology supports partial contents matching?

- A. Indexed Document Matching (IDM)
- B. Described Content Matching (DCM)
- C. Exact Data Matching (EDM)
- D. Optical Character Recognition (OCR)

Correct Answer: A
