### QUESTION 1

A large organization wants to stagger the installation of software updates with computers in different organizational groups by installing the updates on different days.

How can an administrator accomplish this without continually creating separate software update policies that target the different organizational groups?

- A. Configure Site Management settings so that each organizational group downloads the software update installation files from a different package server
- B. Create clones of the Default Software Update Plug-in Policy and modify the target in each policy
- C. Configure an automation policy that periodically disables the Software Update Plug-in by organizational group
- D. Create clones of the Windows Patch Remediation Settings and modify the target in each policy

Correct Answer: A

### QUESTION 2

How should an administrator configure the components on the left in order to inventory computers that are connected only through the Internet?

Drag and drop the components on the left into the correct zones on the right.

Select and Place:

Microsoft SQL Server database

Notification Server

Deployment Site Server

Software Deployment Server

Firewall

Internet Gateway Server

Linux Server

Windows desktop computer

Components

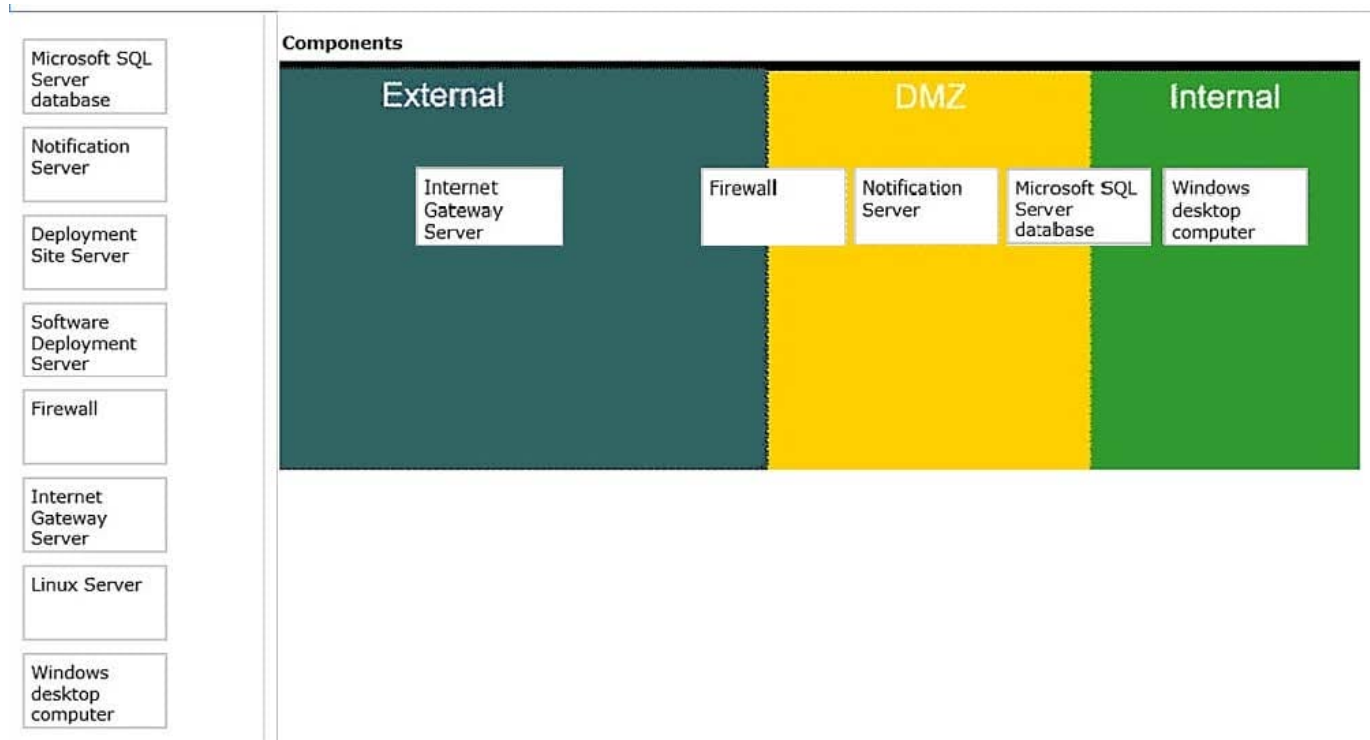

External

DMZ

Internal

Correct Answer:

### QUESTION 3

An administrator is running the latest Patch Management compliance reports and notices that certain endpoints are listed as vulnerable. The administrator knows that the endpoints are compliant, resulting in the inability to provide reliable compliance reports.

What Patch Management Solution setting will most likely resolve this discrepancy?

- A. Enable "Send additional status events..." in the Windows Patch Remediation Settings
- B. Enable "Send Inventory Results Only If..." in the Windows Patch Remediation Settings
- C. Enable "Send additional status events..." in the Windows Patch Remediation Settings
- D. Enable "Start the scan immediately when..." in the Windows Patch Remediation Settings

Correct Answer: A

### QUESTION 4

What is the maximum number of computers that could be adequately managed for an "on-box" installation of the Microsoft SQL Server with Notification Server?

- A. 10,000
- B. 7,500

C. 12,500

D. 5,000

Correct Answer: D

### QUESTION 5

A company has an environment where only some computers have the Symantec Workspace Virtualization (SWV) agent installed.

What happens to computers without the SWV Agent when an administrator distributes an MSI application through a Managed Delivery policy to all company computers and installs the application into a virtual layer?

A. The application installation fails

B. The application is installed as non-virtual, but the application is moved into a virtual layer after the SWV agent is installed

C. The SWV agent is automatically installed; then the application is installed into a virtual layer

D. The application is installed as non-virtual

Correct Answer: A
