QUESTION 1

You\'re the administrator of a production database environment, including a large transaction processing complex, a large decision support system, and smaller systems dedicated to supporting functions, such as backups. Uptime is critical, and the DBA for the environment has found the mechanisms at his disposal for sharing data among the environment\\'s functions cumbersome.

How can Storage Foundation\\'s point-in-time copy capabilities help manage the environment more effectively? (Select two)

A. You can use PITCs to transfer daily transaction data between systems.

B. You can use PITCs to propagate physical database objects between the OLTP system and decision support systems.

C. You can use PITCs to summarize information accumulated by the OLTP system.

D. You can use PITCs to capture instant backup images.

E. You can use PITCs to enable real-time access to OLTP data by the decision support system.

Correct Answer: BD
