QUESTION 1

How do Cascade Performance Analytics assist with Performance Monitoring?

- A. By setting intelligent static thresholds for Application metrics and Interface metrics, tolerance can be determined. Cascade will use these thresholds and tolerances to report on deviations indicative of performance problems.
- B. The Customer only needs to identify their critical hosts, interfaces and/or applications, and Cascade will automatically baseline their behavior and report on deviations indicative of performance problems.
- C. The Performance Analytics use knowledge of hosts, interfaces, and/or applications are able to detect security threats such as host scans and worms.
- D. After baselining is completed, Cascade can re-route congested traffic to avoid congested application delivery paths.

Correct Answer: B

QUESTION 2

On Cascade Profiler, can you run a traffic report that shows all traffic from inside the network to outside the network, but excludes a proxy server?

- A. No, this cannot be done with Cascade.
- B. Set up the query to ask for all hosts between: Hosts "Within" a group "ByInternalHosts: All" (where All is a host grouping containing all inside address space) and for Peers set to "Outside of. ByInternalHosts:All".
- C. Configure query as B above but also add the Proxy Server to the "Outside" list.
- D. Configure query as B above but also add the Proxy Server as a "not" in the Traffic Expression field. The expression to add would be "not host proxyhost " where proxyhost is the IP Address of the proxy.

Correct Answer: D

QUESTION 3

Which of the following capabilities are supported by the Cascade Sensor appliance but are not supported by the Cascade Sensor-VE RSP package. (Select 2)

- A. Network Round Trip measurement
- B. Packet logging
- C. Server Delay measurement
- D. Connection Throughput measurement
- E. Retransmission measurement
- F. L7 application fingerprint checking

Correct Answer: BF

QUESTION 4

When the Discovery wizard presents all newly discovered application-ports as candidates to be included as segments for monitoring within a Service, which of the following actions will save the segment as part of the Service, but will not implement monitoring of the traffic? This action will also suppress the same application-ports from being presented in any future discovery.

- A. Merge
- B. Add
- C. Drop
- D. Delete
- E. Discover

Correct Answer: C

QUESTION 5

What is the chart granularity possible through the Cascade Pilot UI? (Select 2)

- A. 1 second on a local System, 10 milliseconds on Cascade Sharks.
- B. 1 millisecond for any View.
- C. 1 millisecond for specific Views.
- D. Generally minimum 1 second, maximum 1 day.

Correct Answer: CD
