**QUESTION 1**

Refer to the exhibit.

An administrator set up the following configuration:

The distributed switch has three ESXi hosts, and each host has two 40 Gbps NICs. The amount of bandwidth reserved for virtual machine (VM) traffic is 6 Gbps.

The administrator wants to guarantee that VMs in the Finance distributed port group can access 50 percent of the available reserved bandwidth for VM traffic. k

Given this scenario, what should the size (in Gbps) of the Finance network resource pool be?

- A. 18
- B. 80
- C. 36
- D. 120

Correct Answer: A

Explanation: The size of the Finance network resource pool should be 50 percent of the reserved bandwidth for VM traffic, which is 6 Gbps x 3 hosts = 18 Gbps. References: <https://docs.vmware.com/en/VMwarevSphere/7.0/com.vmware.vsphere.networking.doc/GUID-9F1D4E96-3392-4681-AE85-2F36D2605844.html>

QUESTION 2

Which two statements are true regarding the use of firmware update packages in vSphere Lifecycle Manager? (Choose two.)

- A. A hardware support manager must be registered as a vCenter Server extension.
- B. The firmware and drivers add-on are distributed through the official VMware online depot.
- C. The firmware and drivers add-on can be used on clusters that are managed with baselines.
- D. The firmware and drivers add-on can add or remove components from the ESXi base image.
- E. The firmware and drivers add-on is provided by a third-party vendor.

Correct Answer: AD

<https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere-lifecycle-manager.doc/GUID-34AF5B19-FC80-4915-8358-D5FCC8A8E69E.html>

QUESTION 3

In a vSphere High Availability (vSphere HA) cluster, which action does vSphere HA take when the VM Monitoring service does NOT receive heartbeats from a virtual machine (VM) in the cluster? (Choose the best answer.)

- A. The VM is restarted on a different host in the cluster.
- B. The VM is suspended on the same host in the cluster.
- C. The VM is migrated to a different host in the cluster.
- D. The VM is restarted on the same host in the cluster.

Correct Answer: A

QUESTION 4

Which virtual disk option allows a virtual machine to consume the minimum storage capacity? (Choose the best answer.)

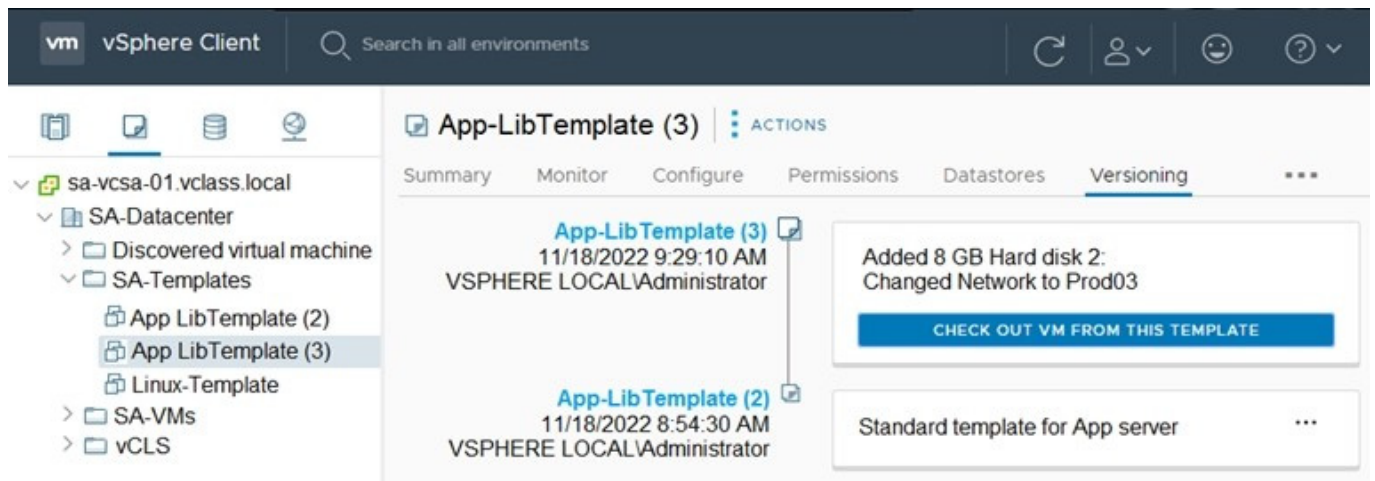

- A. Independent persistent
- B. Lazy-zeroed thick-provisioned

- C. Eager-zeroed thick-provisioned
- D. Thin-provisioned

Correct Answer: D

QUESTION 5

Refer to the exhibit.

Given the configuration shown in the exhibit, what should the administrator do if the latest VM template contains changes that are no longer needed?

- A. Delete App-LibTemplate (2)
- B. Revert to App-LibTemplate (2)
- C. Delete App-LibTemplate (3)
- D. Check out App-LibTemplate (3)

Correct Answer: B

Explanation: Deleting App-LibTemplate (3) will remove the changes that are no longer needed and revert to the previous version of the template.

References: https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.vm_admin.doc/GUID-9A5093A5-C54F-4502-941B-3F9C0F573A39.html

https://docs.vmware.com/en/VMware-vSphere/7.0/com.vmware.vsphere.vm_admin.doc/GUID-D69B0279-CC9B-495B-9CA3-AE975AF9C865.html

If the latest VM template contains changes that are no longer needed, the administrator should revert to the previous version of the template¹. Here are the steps to revert to a previous version of a template¹:

Navigate to the Versioning tab of the VM template. From the vertical timeline, navigate to the previous state of the VM template. Click the horizontal ellipsis icon (⋮), and select Revert to This Version. The Revert to Version dialog box opens.

Enter a reason for the revert operation and click Revert.

So, in this case, the correct answer is: B. Revert to App-LibTemplate (2) This will make App-LibTemplate (2) the current VM template1. Please note that this operation will not delete App-LibTemplate (3), it will simply make App-LibTemplate (2) the current version1.
