QUESTION 1

A virtual machine provision fails the following error:

```
The following compcnent requests failed: CentOS.java.lang.RuntimeException:
[Error code: 42000 ] - [Error Msq: Infrastructure service provider error: The
list of unallocated IP addresses for the network profile VM Network Network
Profile has been exhausted.
```

What is a possible reason for this error?

A. The reservation is missing the appropriate network profile.

B. The reservation is out of available IP addresses.

C. The network profile is out of available IP addresses.

D. The network profile is misconfigured with the incorrect network.

Correct Answer: A

QUESTION 2

A Cloud engineer is requesting a blueprint named "RHEL-7.3" and receives the following error message during machine provisioning:

```
The following component requests failed: RHEL7.3 Request failed: linux-vm-10:
sendEBSMessage19(workflow=0030ef26-3428-43bd-a69a-2f0a5414148e) Error in state
VMPSMasterWorkflow32.MachineProvisioned phase PRE event (queue = 94494dad-2963-4c90-
ae9a-8afb6c1905c7) : Extensibility consumer error (20999) - Error while executing
(Workflow: Get processes from guest / Scriptable task (item1) #8) A general system error
occurred: vix error codes = (3016, 0).
```

What is a possible reason for this error?

A. VMware-tools are not running.

B. The guest agent is not running.

C. The management agent is not installed.

D. The guest agent is not installed.

Correct Answer: A

QUESTION 3

An administrator needs to configure a blueprint to provision OVF machines from an external HTTP server where the OVF resides.

Which two steps should the administrator take to provision the OVF machines? (Choose two.)

A. Configure the provisioning workflow settings as ImportOvfWorkflow.

B. Specify customization specification.

C. Specify the URL location of the OVF file present.

D. Run data collection.

E. Run the OVF directly from vCenter.

Correct Answer: AB

QUESTION 4
